⚠ The LibyaCrisisMap platform was activated by the request of the Office for the Coordination of Humanitarian Affairs (OCHA) to the Standby Task Force (SBTF). The platform was fully handed over to OCHA supervision in April 2011, and continued to be supported by a team of volunteers until June 4th of 2011.

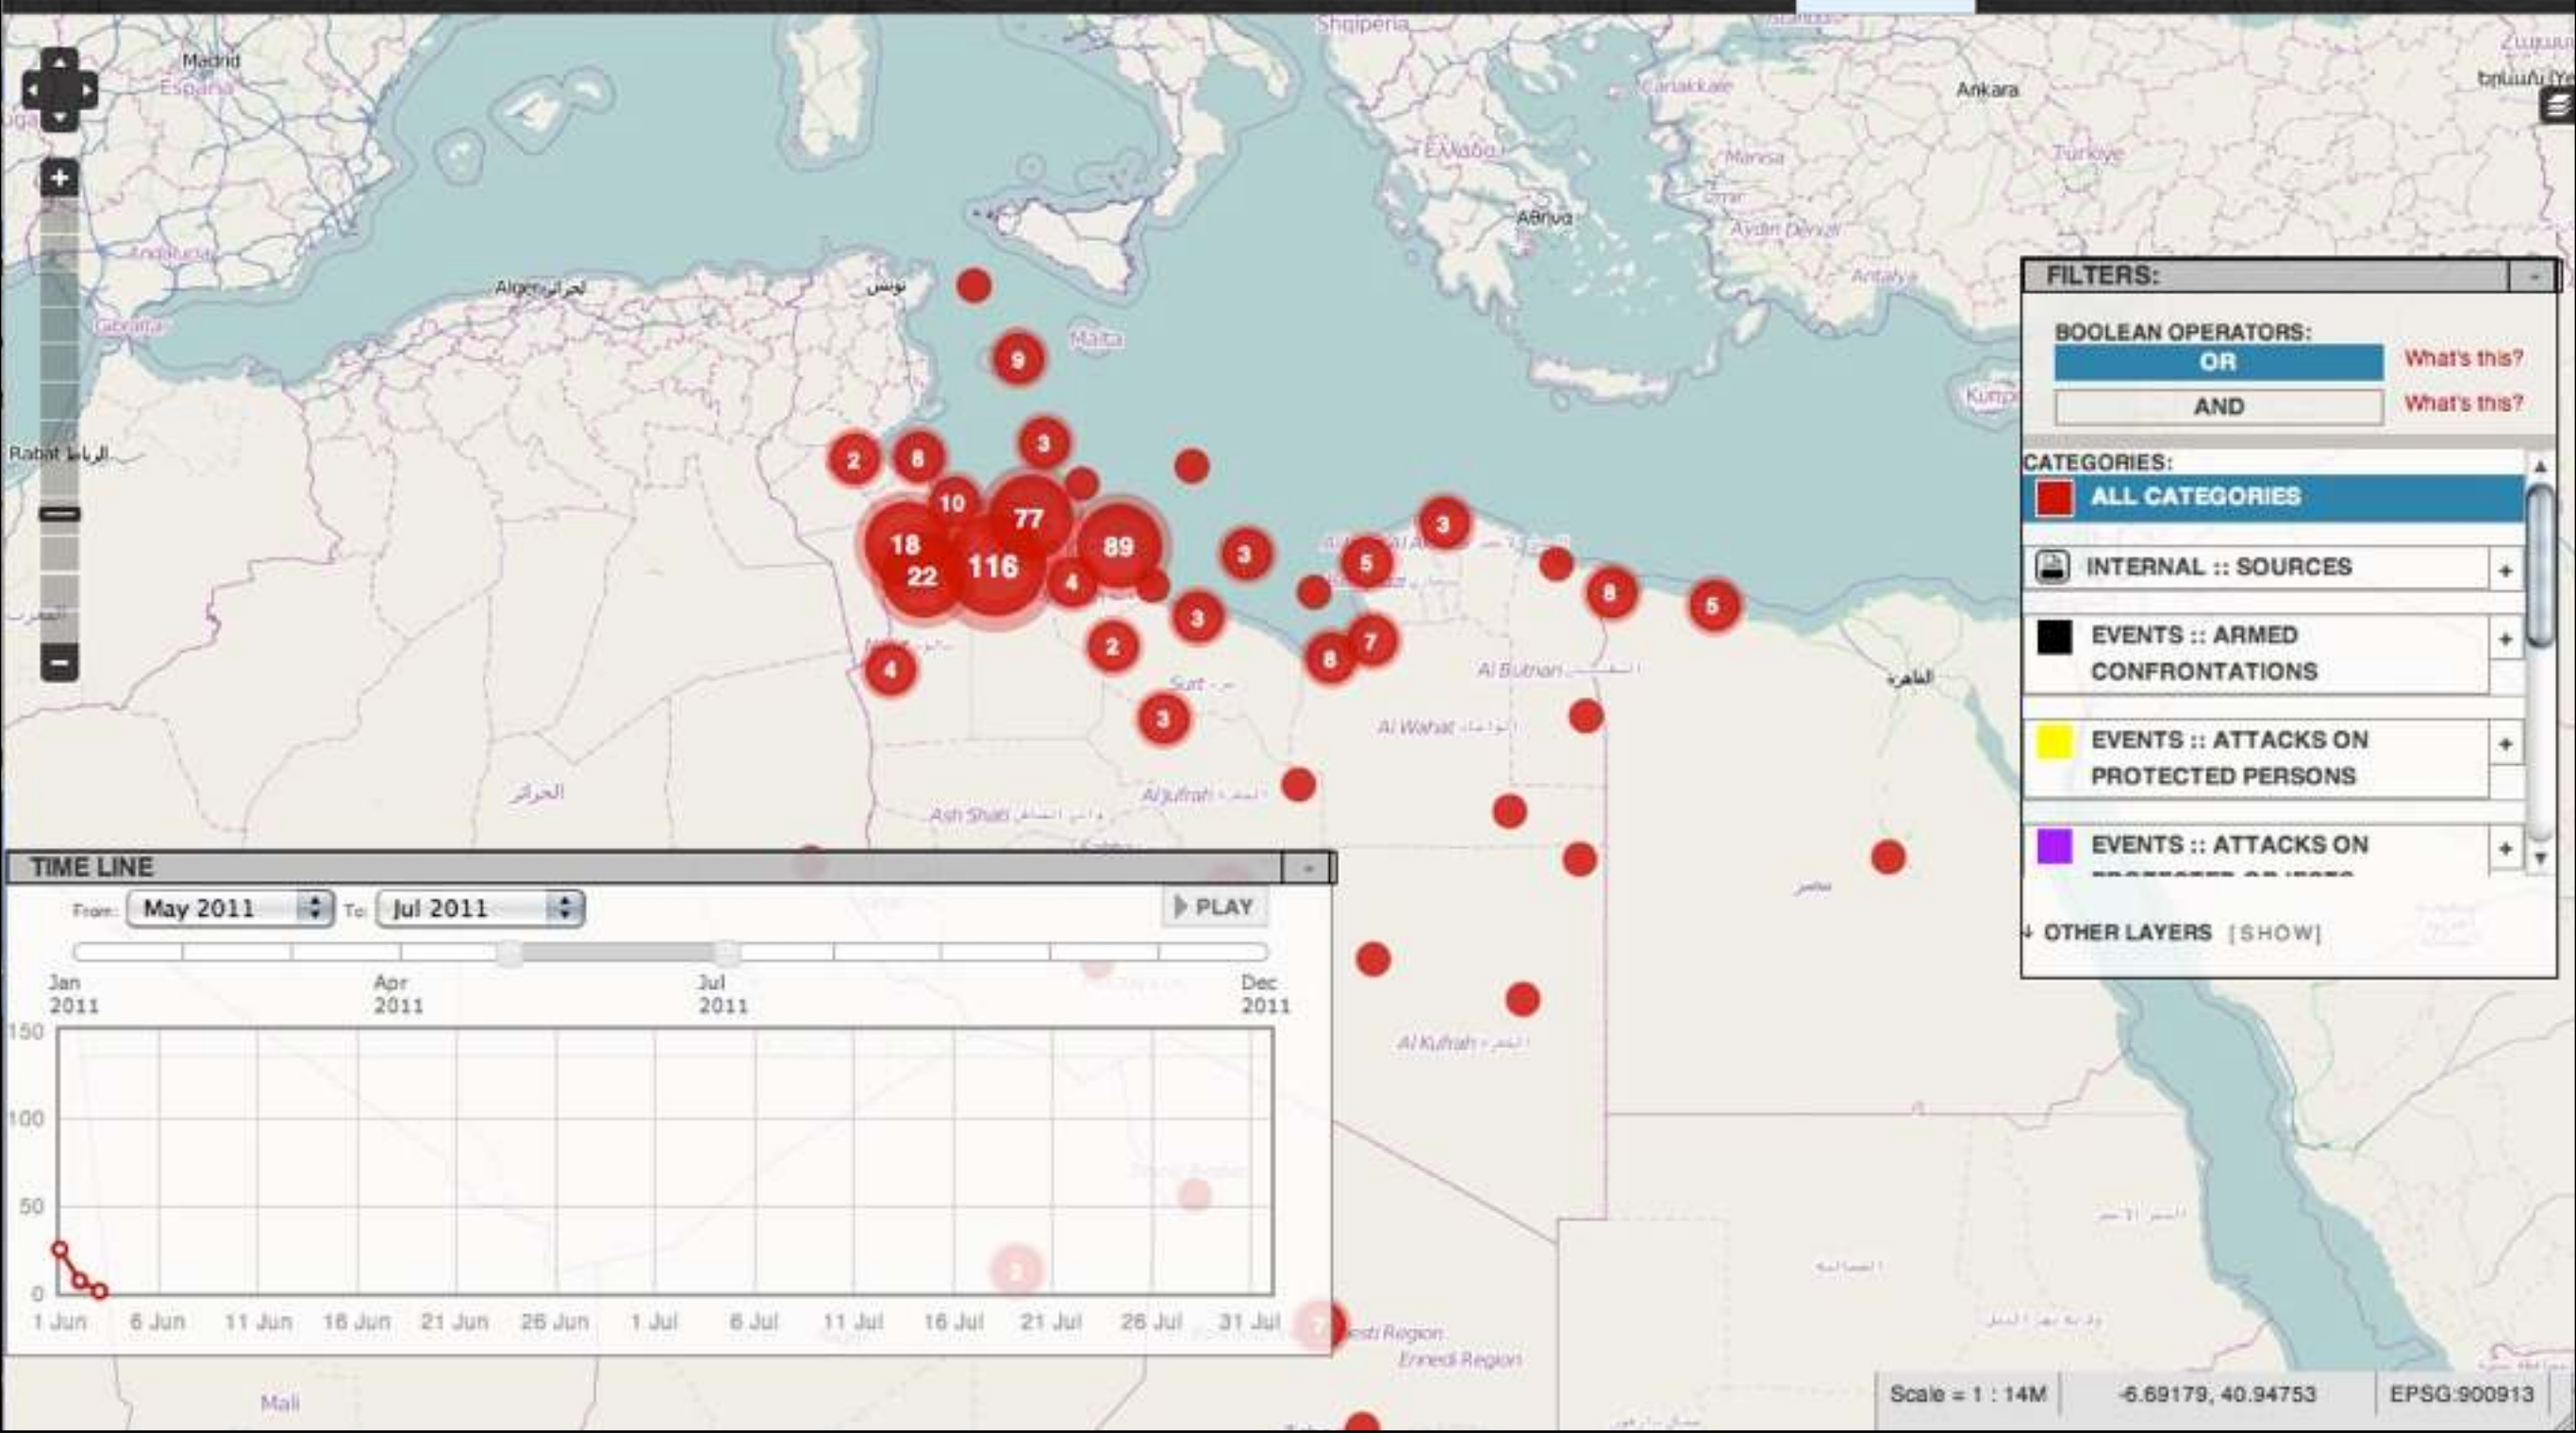

The platform is not currently accepting new reports, but the data will remain available for a couple of months.

The security and ethics of live mapping in repressive regimes and hostile environments

- Please do take the time to READ THIS FIRST if you are in a "non-free" country, including for example some parts of Libya. People have been arrested in Tripoli, for example, in connexion with their activities on the Internet. Note that this wiki is also available through mixed content https - see [3] for a description of associated risk. OSM admins have also lifted the anti-wiki-spam block on exit Tor nodes, in consideration of this crisis, so you should be able to access OSM through the Tor network. HOWEVER this offers no security warranty, so if you are in Libya, and feel it is really necessary, please only send information to OSM through email, as explained in the following document.
- There have been independent reports that some hospitals were specifically targeted, and wounded there killed. *Existing* hospitals are widely known, so there is no risk to mapping them in OSM. Newly established field hospitals may not be, so we are in discussion with responding partners on process with this kind of sensitive information. Further discussion in this document: "Security Concerns for Libya Crisis Map" (File:Security Concerns for Libya Crisis Map.pdf)

WELCOME TO MAPACTION

In a humanitarian crisis, relief agencies need rapid answers to questions about 'where'. Where are the greatest needs? Where are the gaps that need to be filled?

MapAction works in disaster zones providing frequently updated situation maps showing where relief help is most urgently needed.

MAP CATALOGUE

Here disaster relief agencies can access free of charge maps from all current and previous MapAction deployments.

The International Charter

The International Charter aims at providing a unified system of space data acquisition and delivery to those affected by natural or man-made disasters through Authorized Users. Each member agency has committed resources to support the provisions of the Charter and thus is helping to mitigate the effects of disasters on human life and property.

Puyehue volcano in Chile and Argentina

Tuesday, June 7, 2011

After the eruption of the Puyehue-Cordon-Callue volcano range, about 800km (500 miles) south of Santiago, Chilean authorities continue to monitor the direction of ash clouds.

A complete grassroots mapping kit

Make your own 'satellite' for as little as $100: GrassrootsMapping.org »

Helium

$30 per cylinder,
2-3 flights

2 Trash bags

95 gallons, $2 each

Kite

Sutton Flowform 16, $100
or build your own for <$1

Tape

Duct and clear
packing tape, $3

Sticks

1/2 cm, 15 cm long

Clips

Carabiners or
key rings, <$3

String

Cotton, $1

Scissors

Or a knife

Canon camera

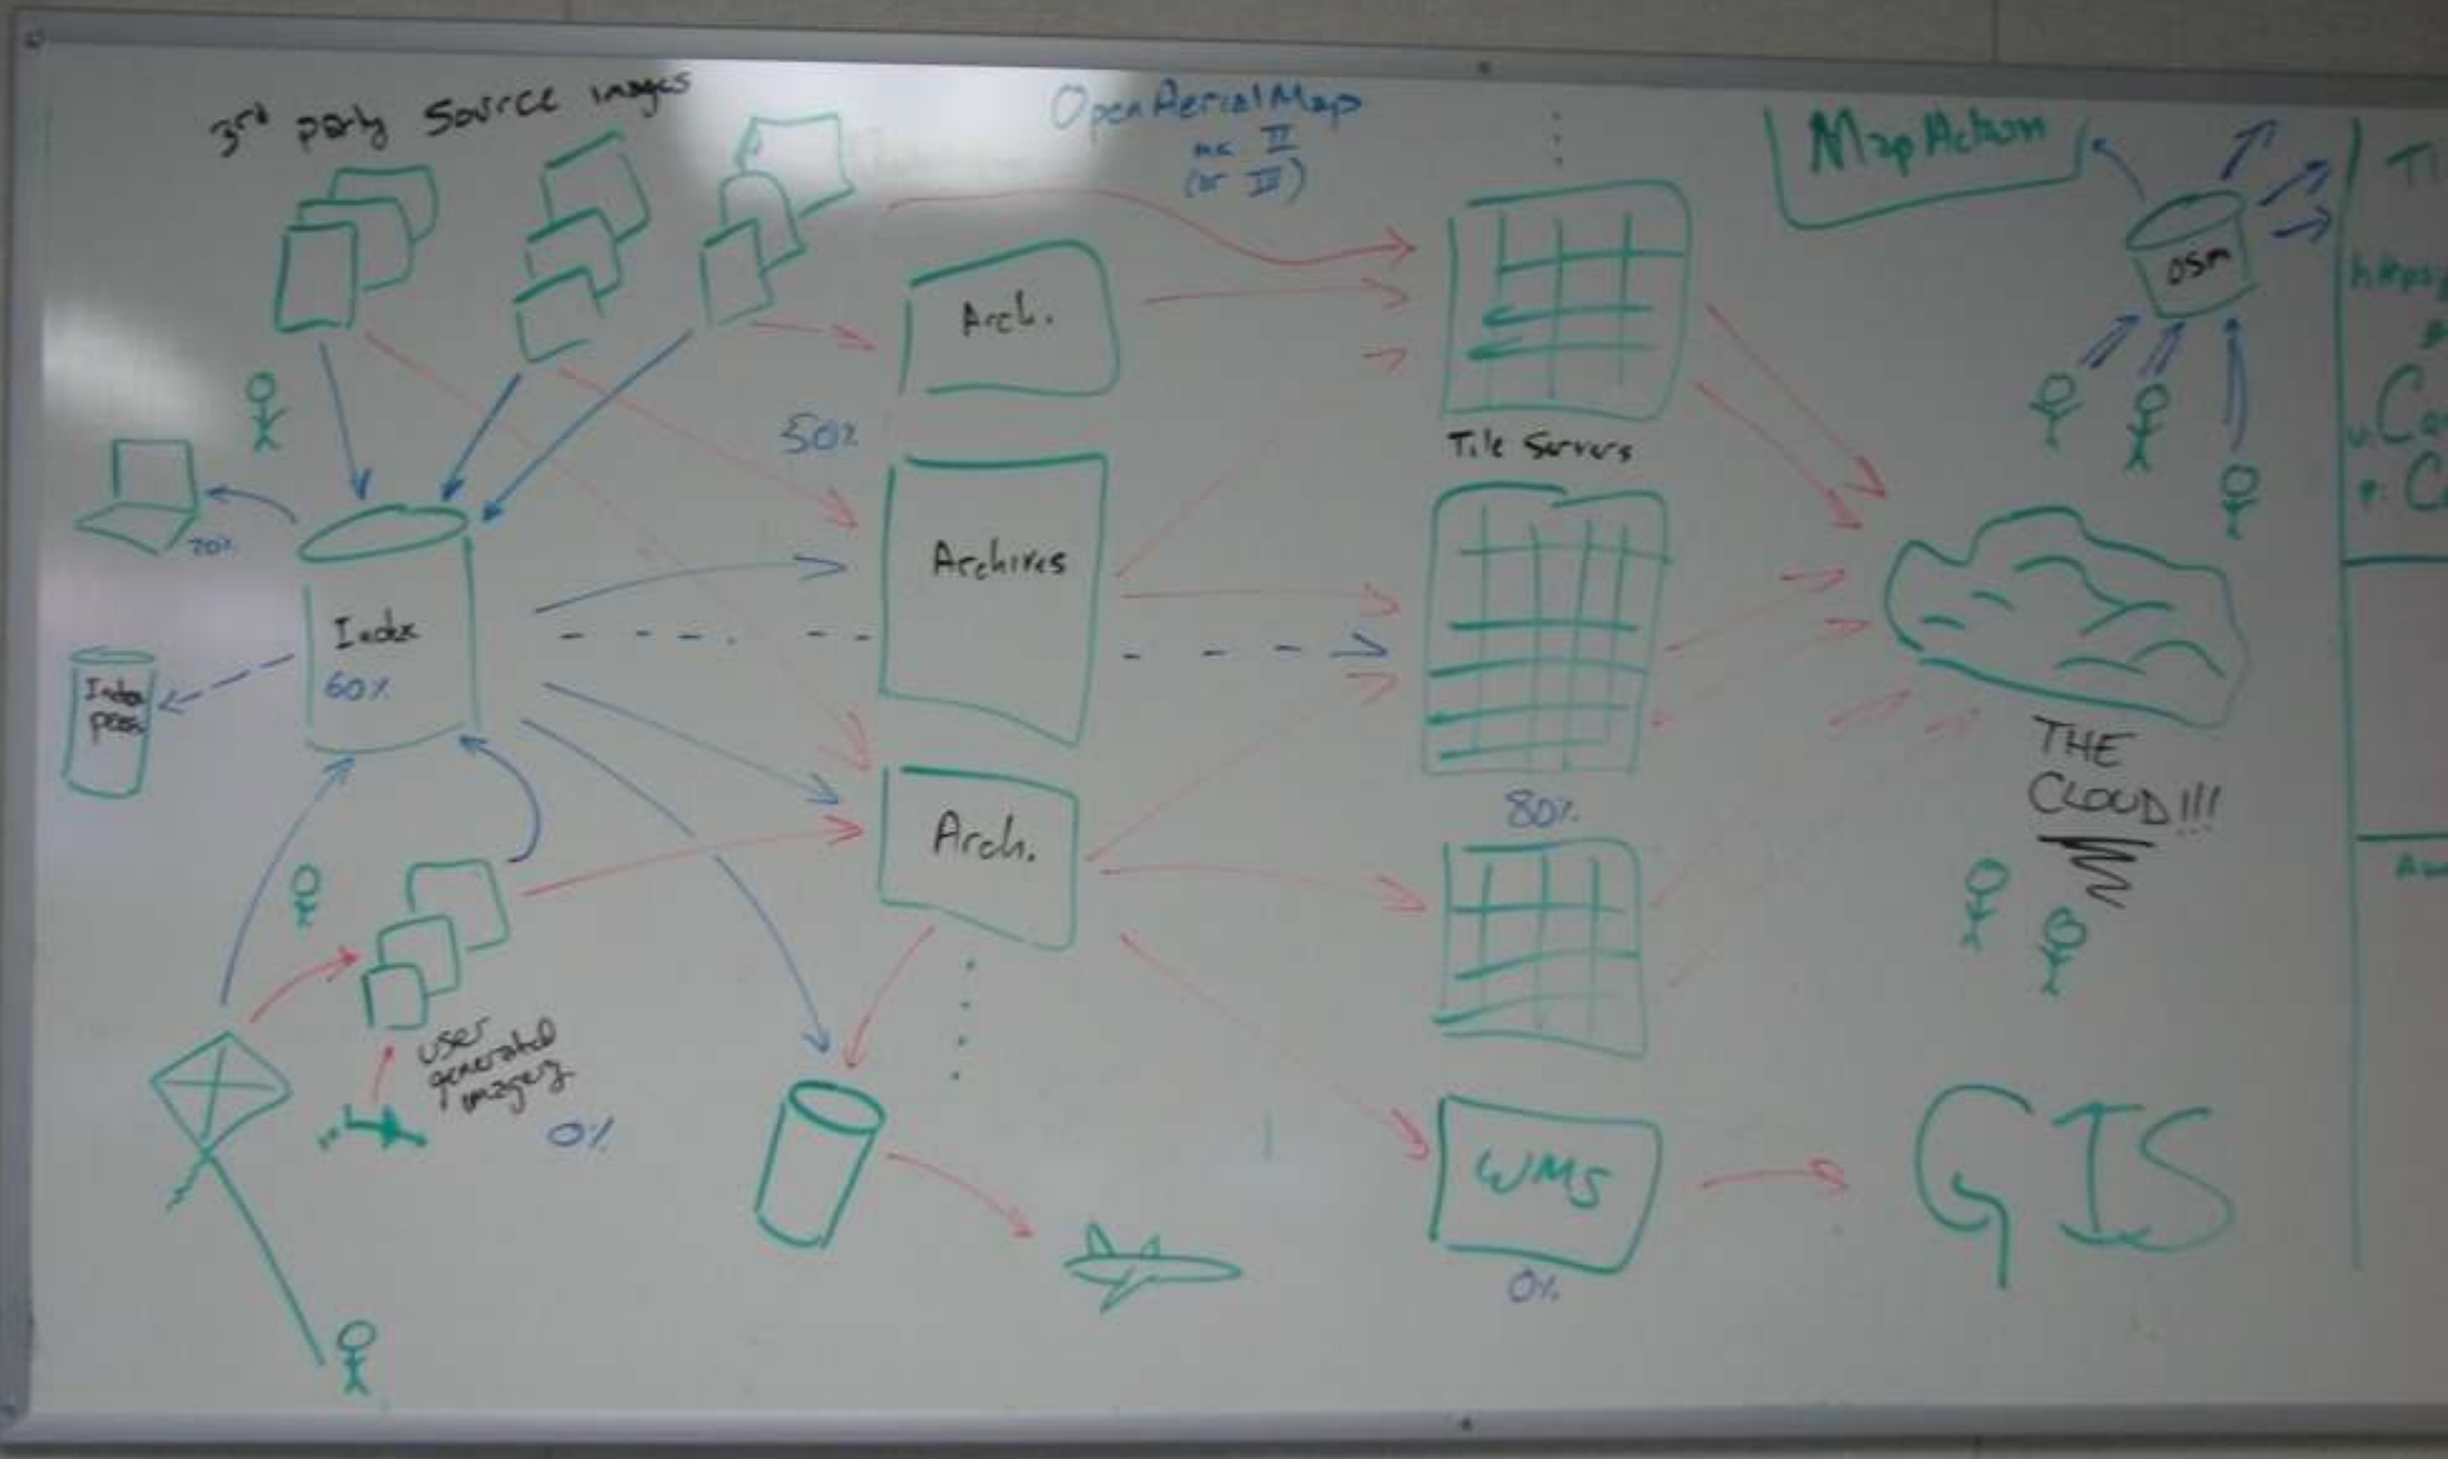

$45 on eBay

Reel

For electric cables, $15
Or use a stick

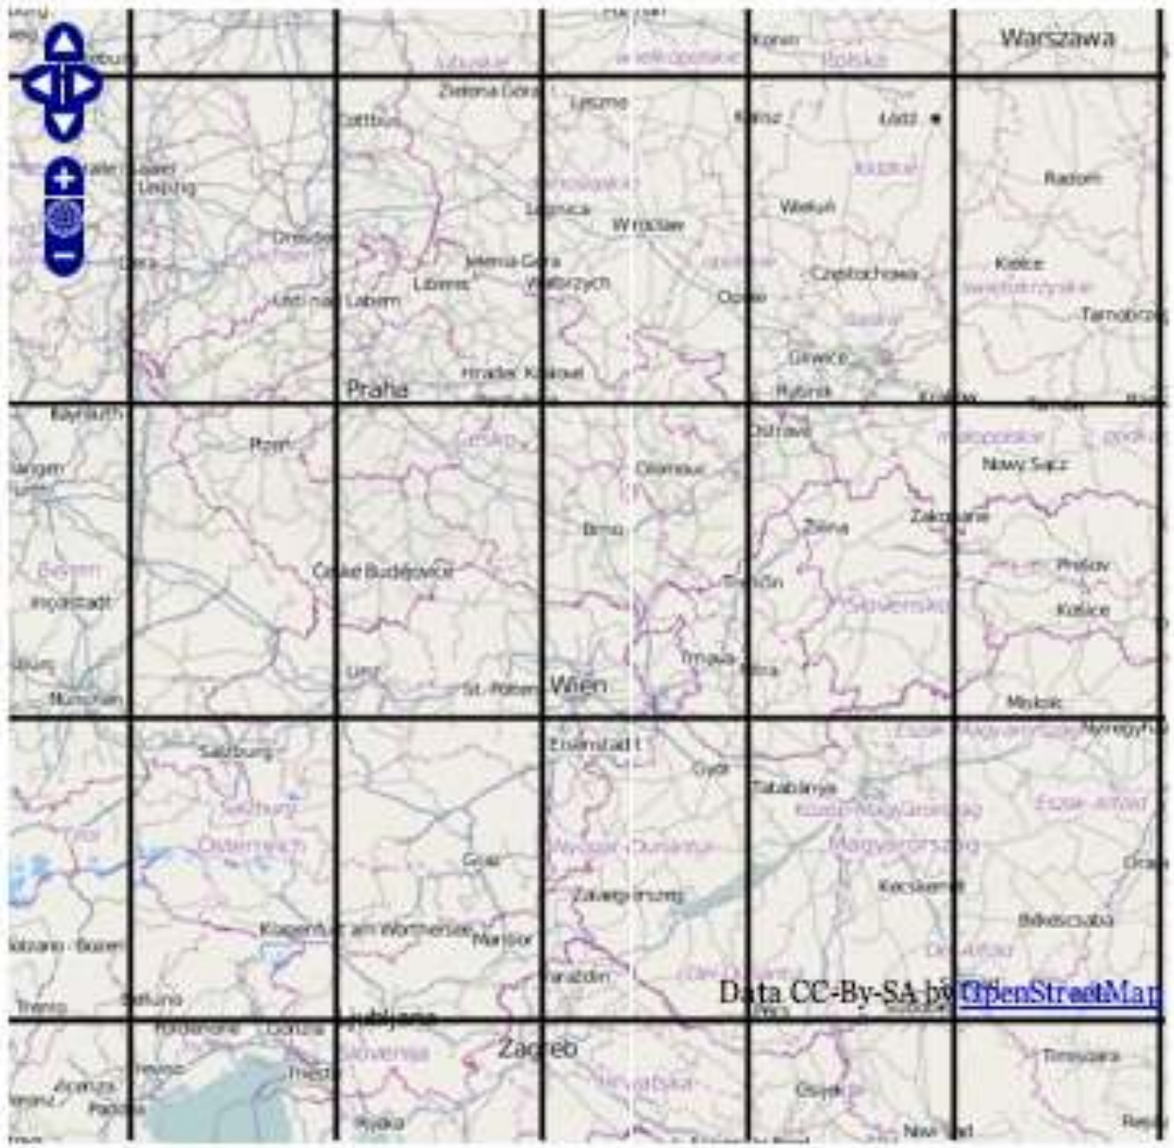

Kite String

200-400 meters, medium-
weight nylon, $6
