Potlatch, the Online Editor [edit]

Potlatch is an editor for OSM data. It is recommended for beginners. To use it, you first must sign in or register (see the top right of the Potlatch screen for the "log in" and "sign up" links). Then, to start, navigate to a map location on www.openstreetmap.org and click on the 'Edit' tab along the top of the screen.

There are several places to get help about using Potlatch:

- The online help of potlatch itself
- These video screencasts on how to use OSM and Potlatch.
- Potlatch/Primer

Some tips [edit]

- It is important to allow data to load, before presuming it isn't there. A relatively common mistake is to duplicate data by adding, before it's clear what's already been added.
- Be sure to check if something is where it is for a reason before shifting it to a seemingly better location.
- At the bottom left of the editing page, the centre bottom button allows you to view GPS data. Shortcut 'G'.

Contents:

Beginners' Guide
1.1 - Collect data
1.1.1 - GPS
1.1.2 - Tracing aerial imagery
1.2 - Upload data
1.2.1 - Save your files to GPX
1.2.2 - Uploading Data
1.3 - Edit maps
1.3.1 - General tips
1.3.2 - Potlatch
1.3.3 - JOSM
1.3.3.1 - Downloading Into JOSM
1.3.3.2 - First basic road
1.3.4 - Merkaartor
1.4 - Edit data
1.4.1 - Adding Tags
