Rule checkers

divide et impera

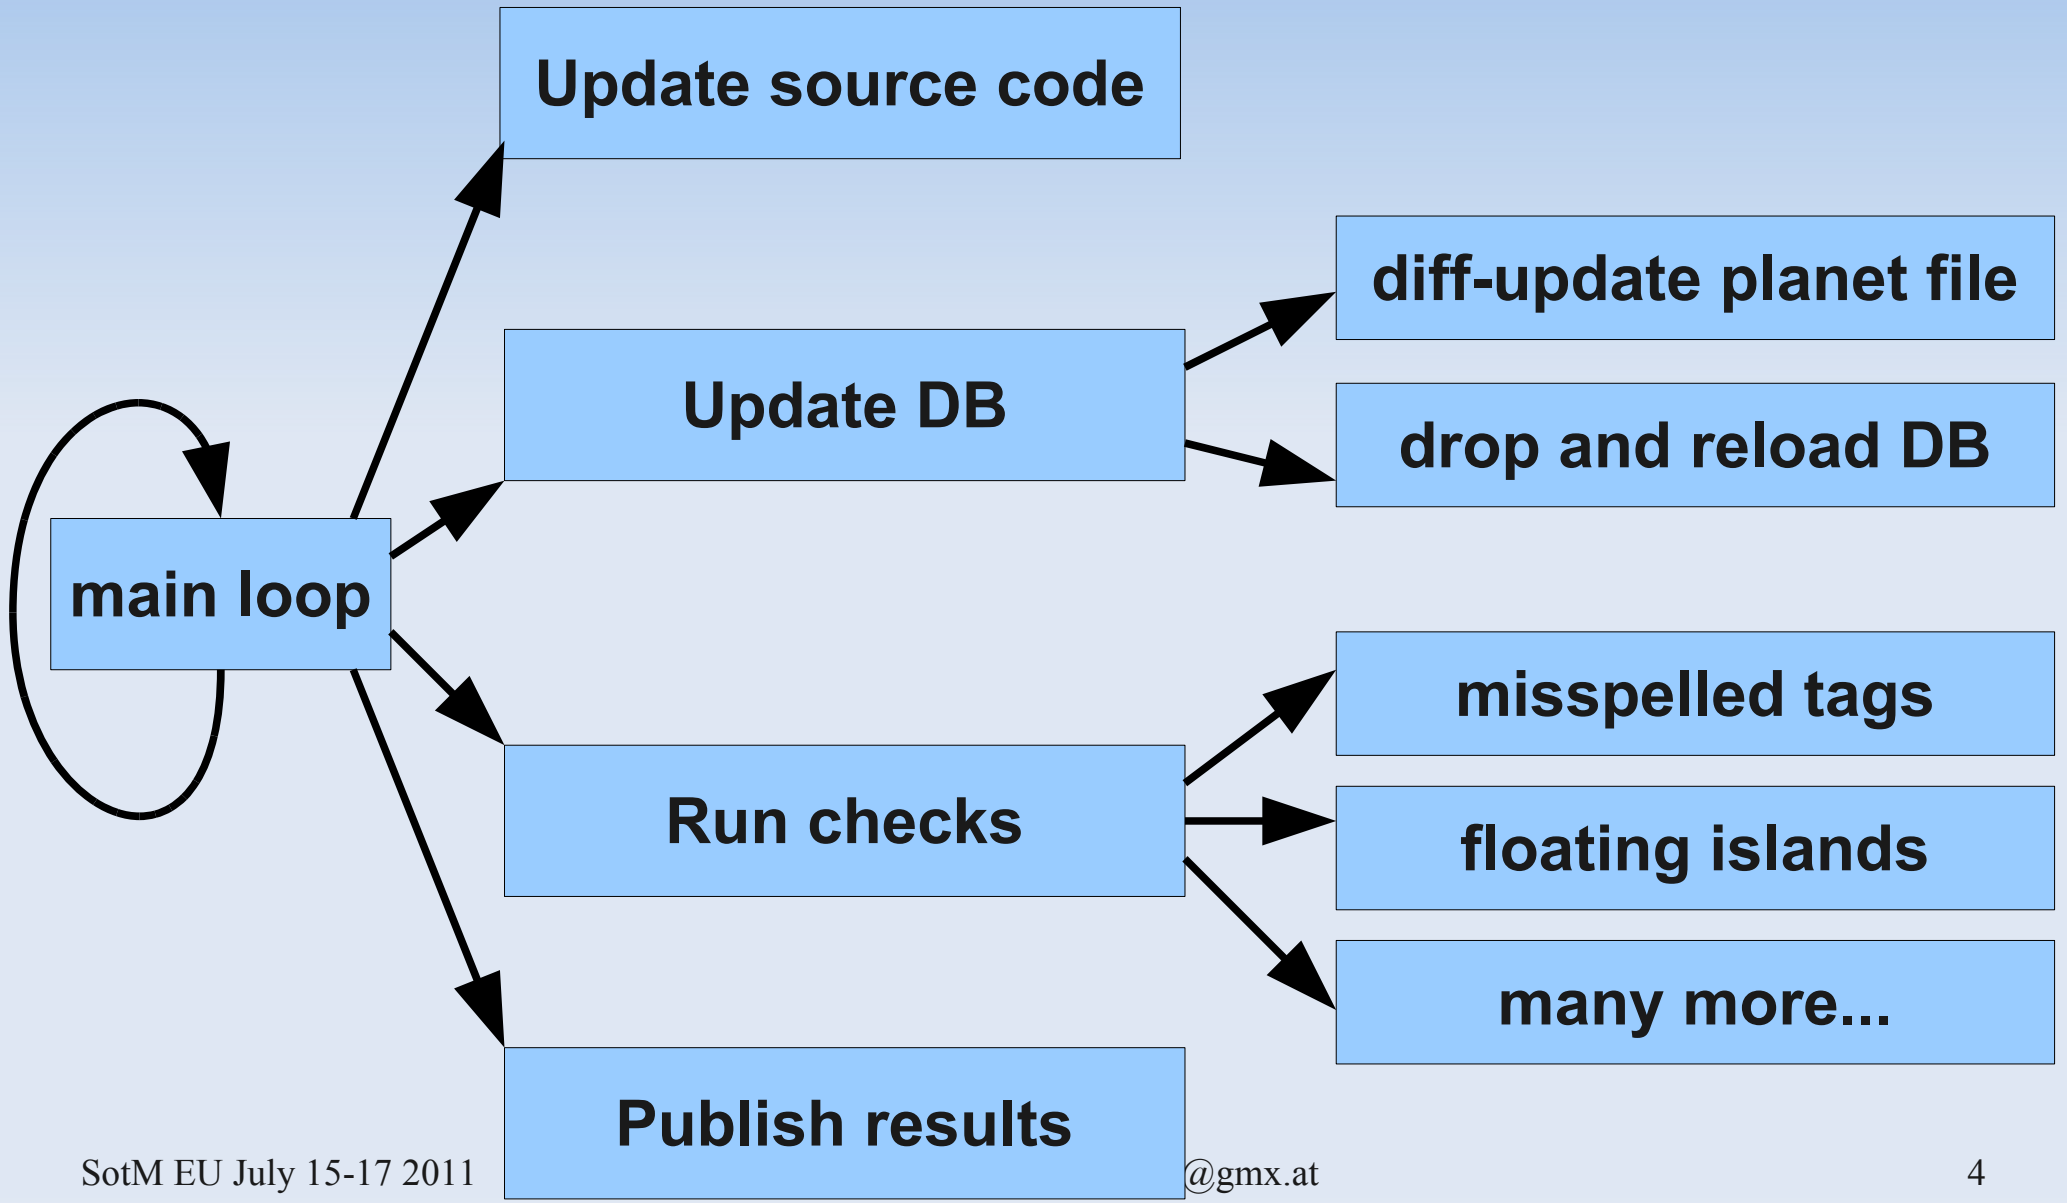

Thesis: There's no relation between a parking lot in Vienna and a supermarket in Tokyo

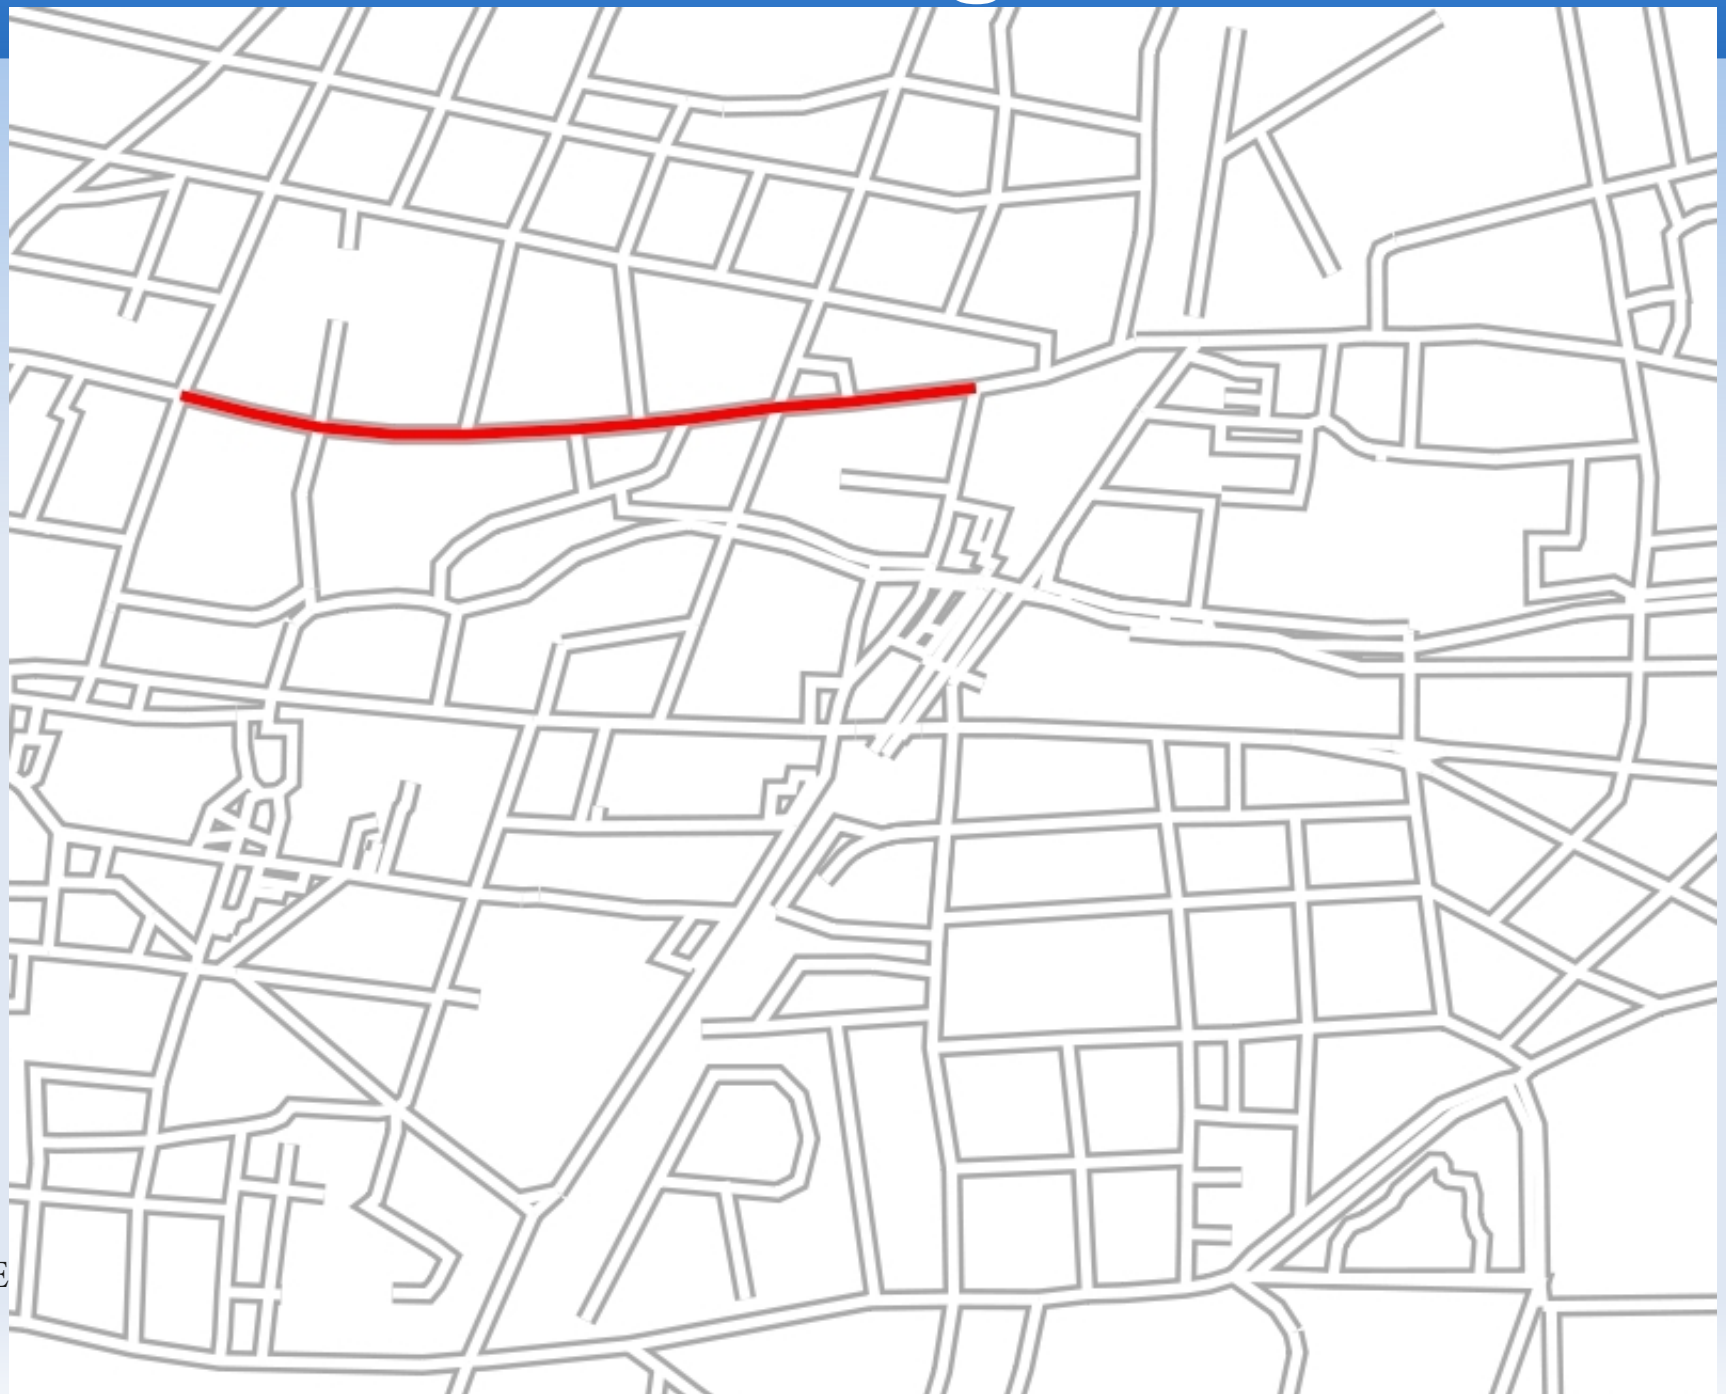

- Split the planet in rectangles
- Split for equally sized files
- Use margin areas (20km)

What next?

- **Planet file: +1GB every 6 weeks**
  Increase efficiency
  Scale hardware → keepright@home
- **More Checks and Better Checks**
  → user input
- **More beautiful user interface**
- **Interfacing with OSM-biosphere**

Calling osmosis

```
./osmosis
--read-replication-interval --simplify-change
--read-xml planet/17.osm –apply-change
--bounding-box left=0 top=35 right=50 bottom=-90
idTrackerType=BitSet completeWays=yes
completeRelations=yes
--write-xml planet/17.osm.new
```
