About 2,000,000 people
live in The Fukushima area.

This is Fukushima City.

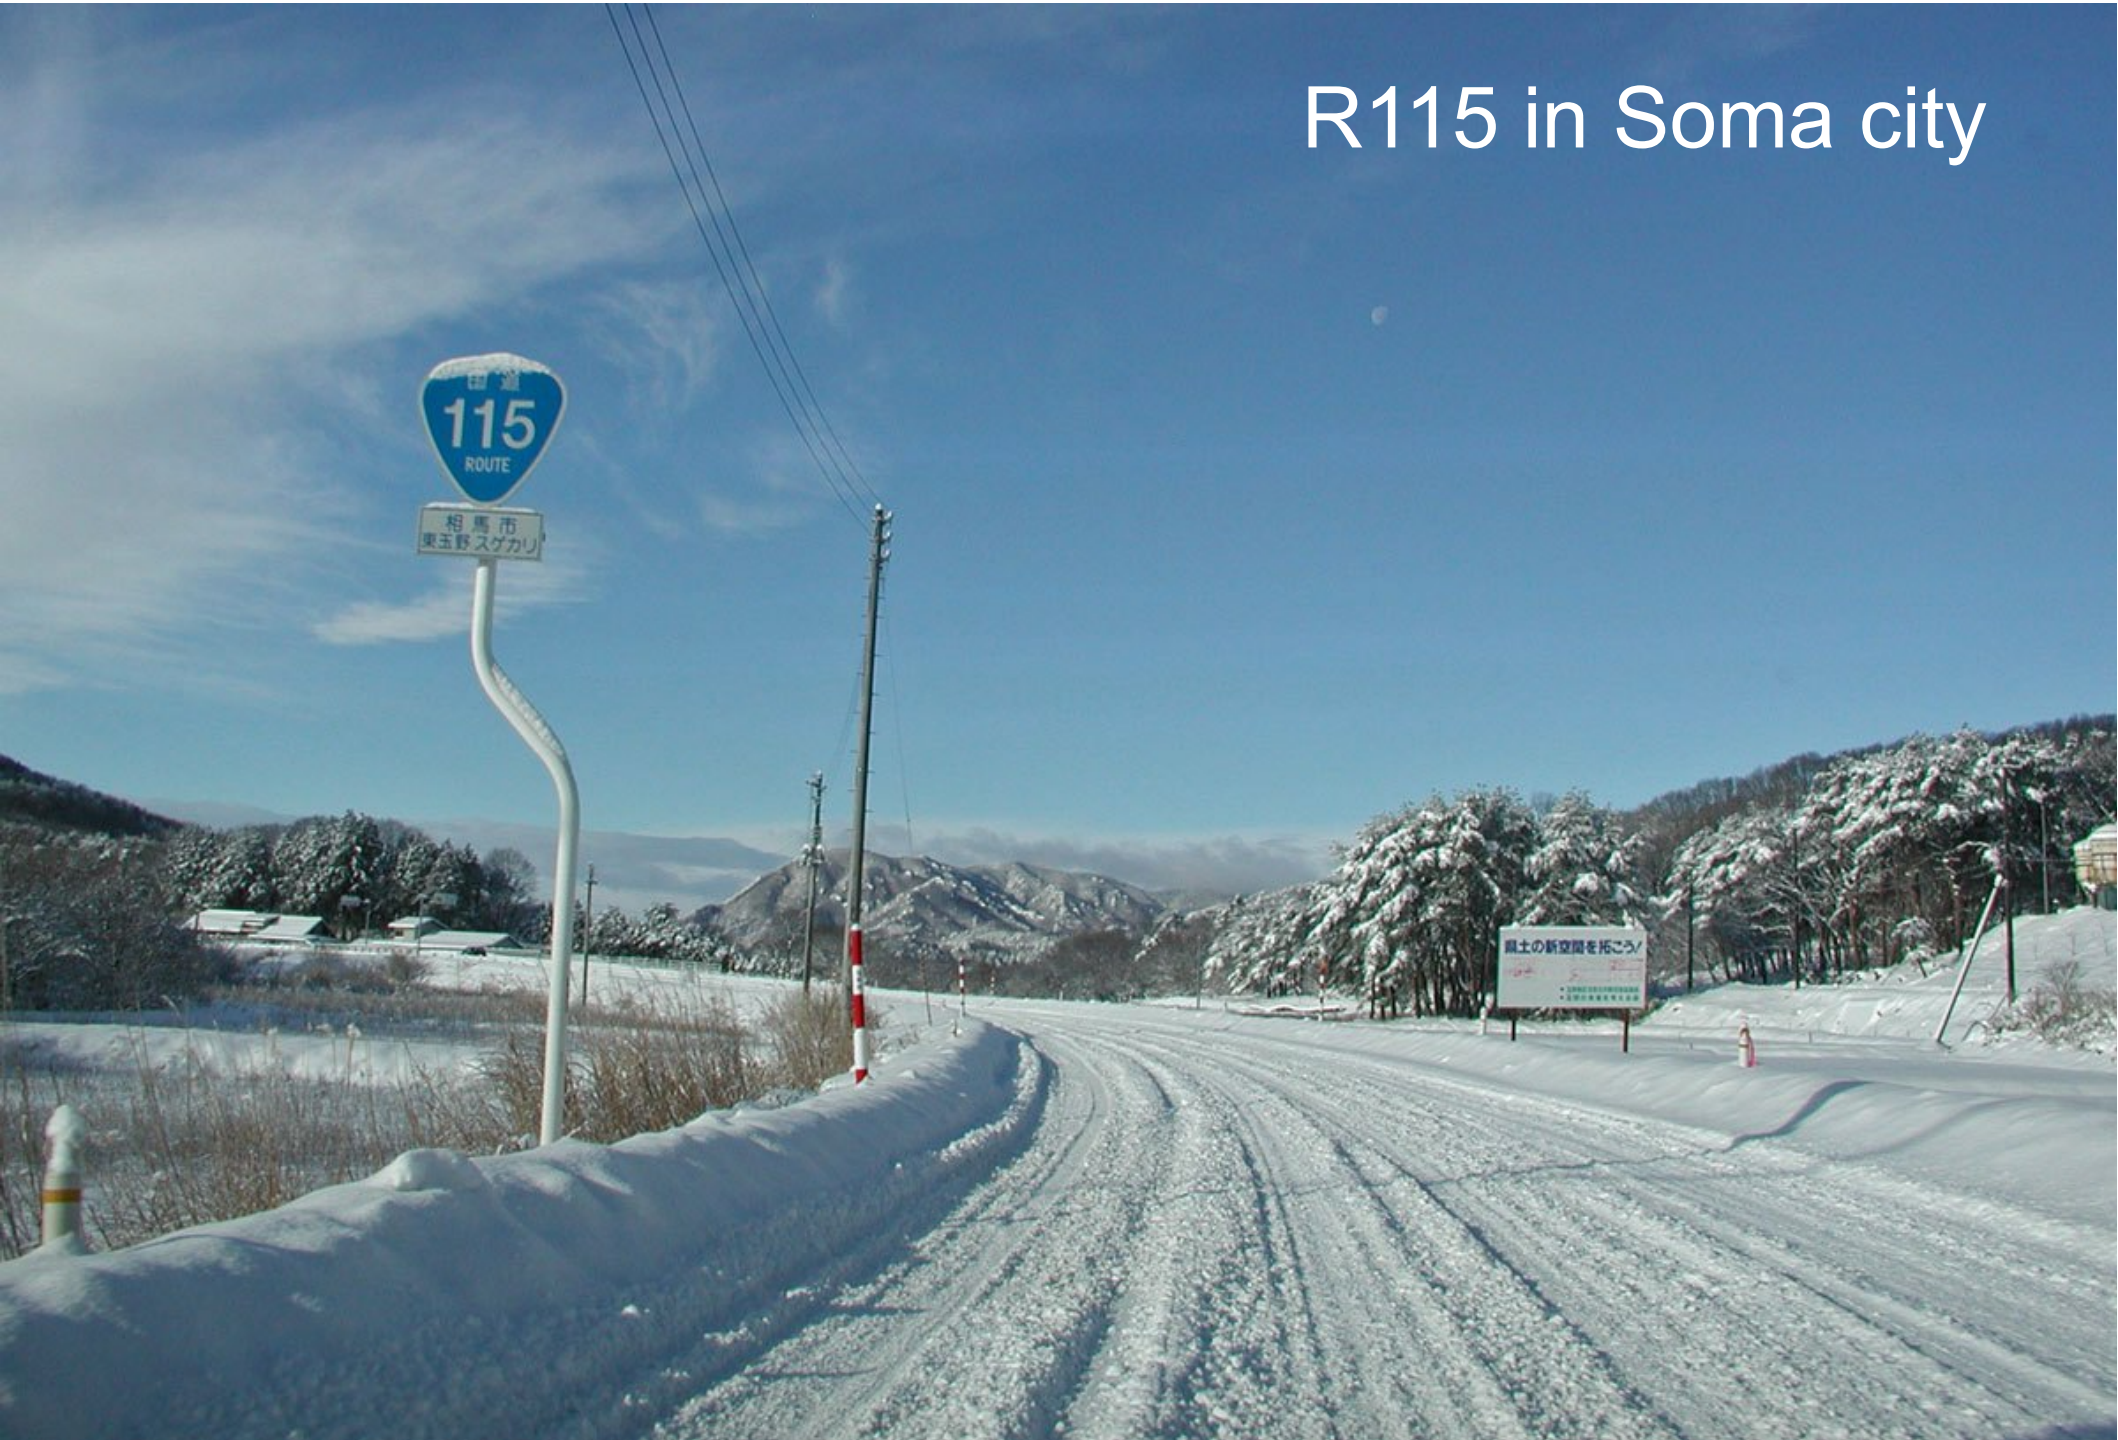

Fukushima City is the prefectural capital.
290,000 peoples live in Fukushima City.

These are my GPS Logs in the Fukushima area.

We map towns in Fukushima.

We map highways in Fukushima.

I've mapped Fukushima coastlines.

Tsuruga Castle

in Aizu Wakamatsu City,Fukushima

I walked and walked in the Castle grounds.

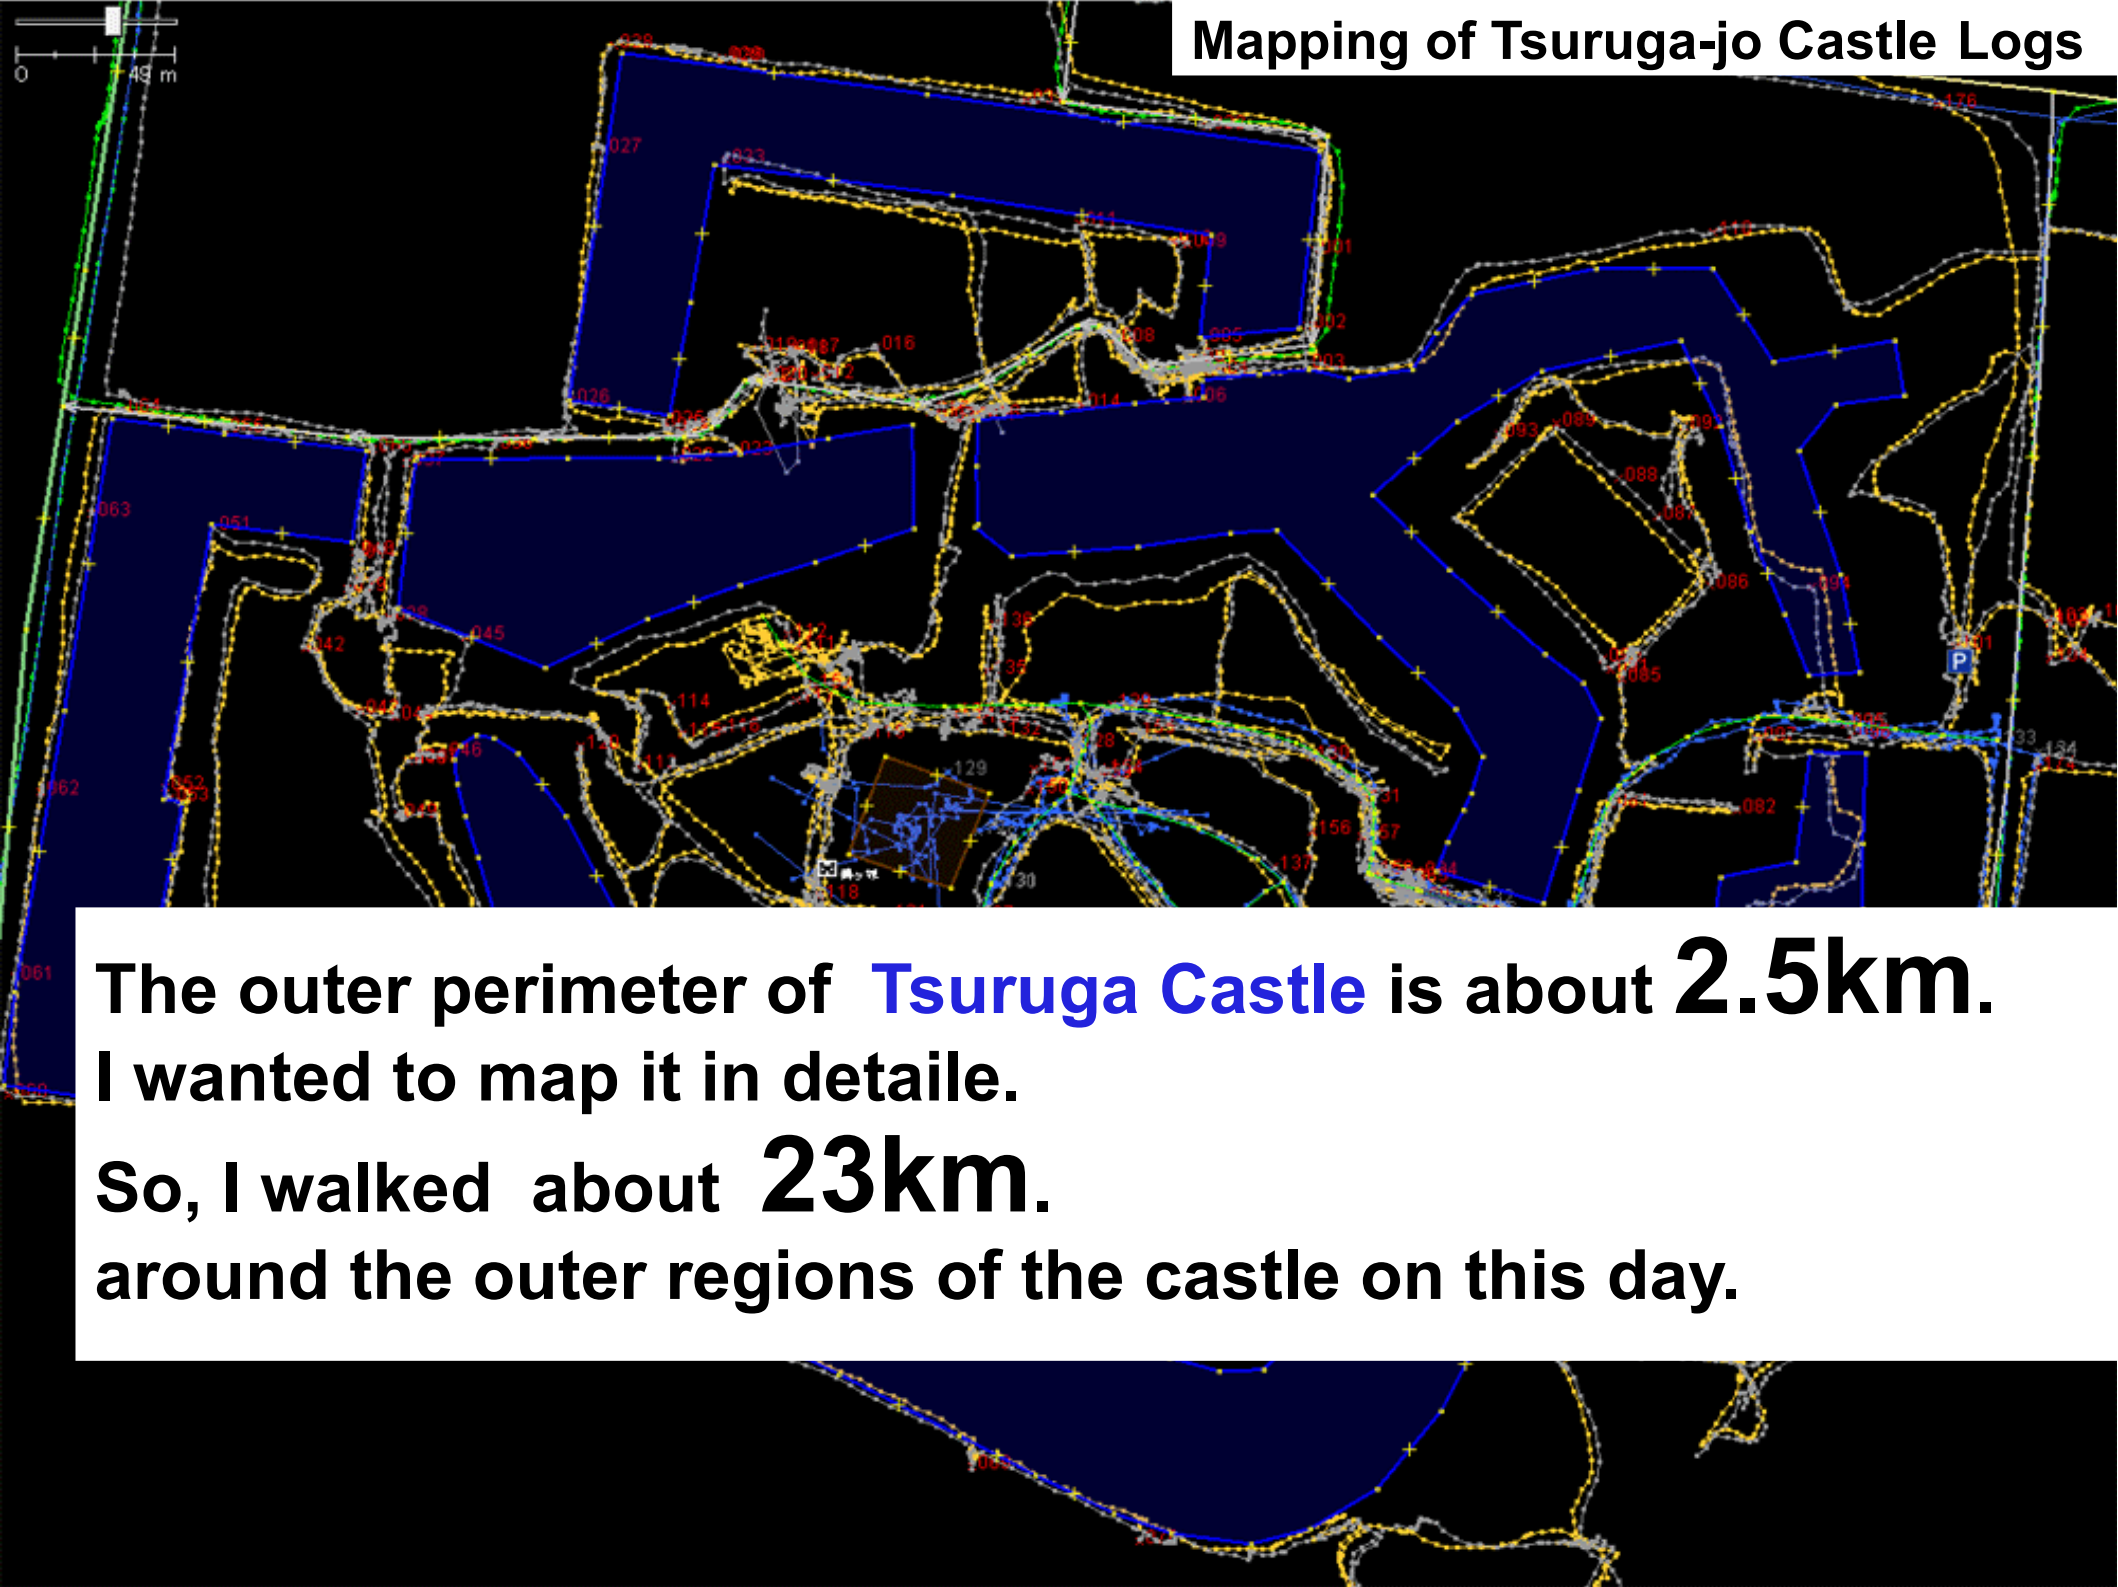

Let's go map!

Sometime I entered dangerous zone.

Mapping of Tsuruga-jo Castle Logs
0
49 m
The outer perimeter of Tsuruga Castle is about 2.5km.
I wanted to map it in detaile.
So, I walked about 23km.
around the outer regions of the castle on this day.

The **2011 Sendai earthquake and tsunami** is a current disaster. See wikipedia:2011 Tōhoku earthquake and tsunami for details and news. OpenStreetMap has good map data in this region, and the Humanitarian OSM Team is on hand to help. An OpenStreetMap based disaster information sharing site sinsai.info has been set up.

2011 Sendai earthquake and tsunami volunteers to **2011 Sendai earthquake and tsunami**.

A lot of Mappers Edited the Tohoku,Japan after the earthquake.

Thank you
so much.

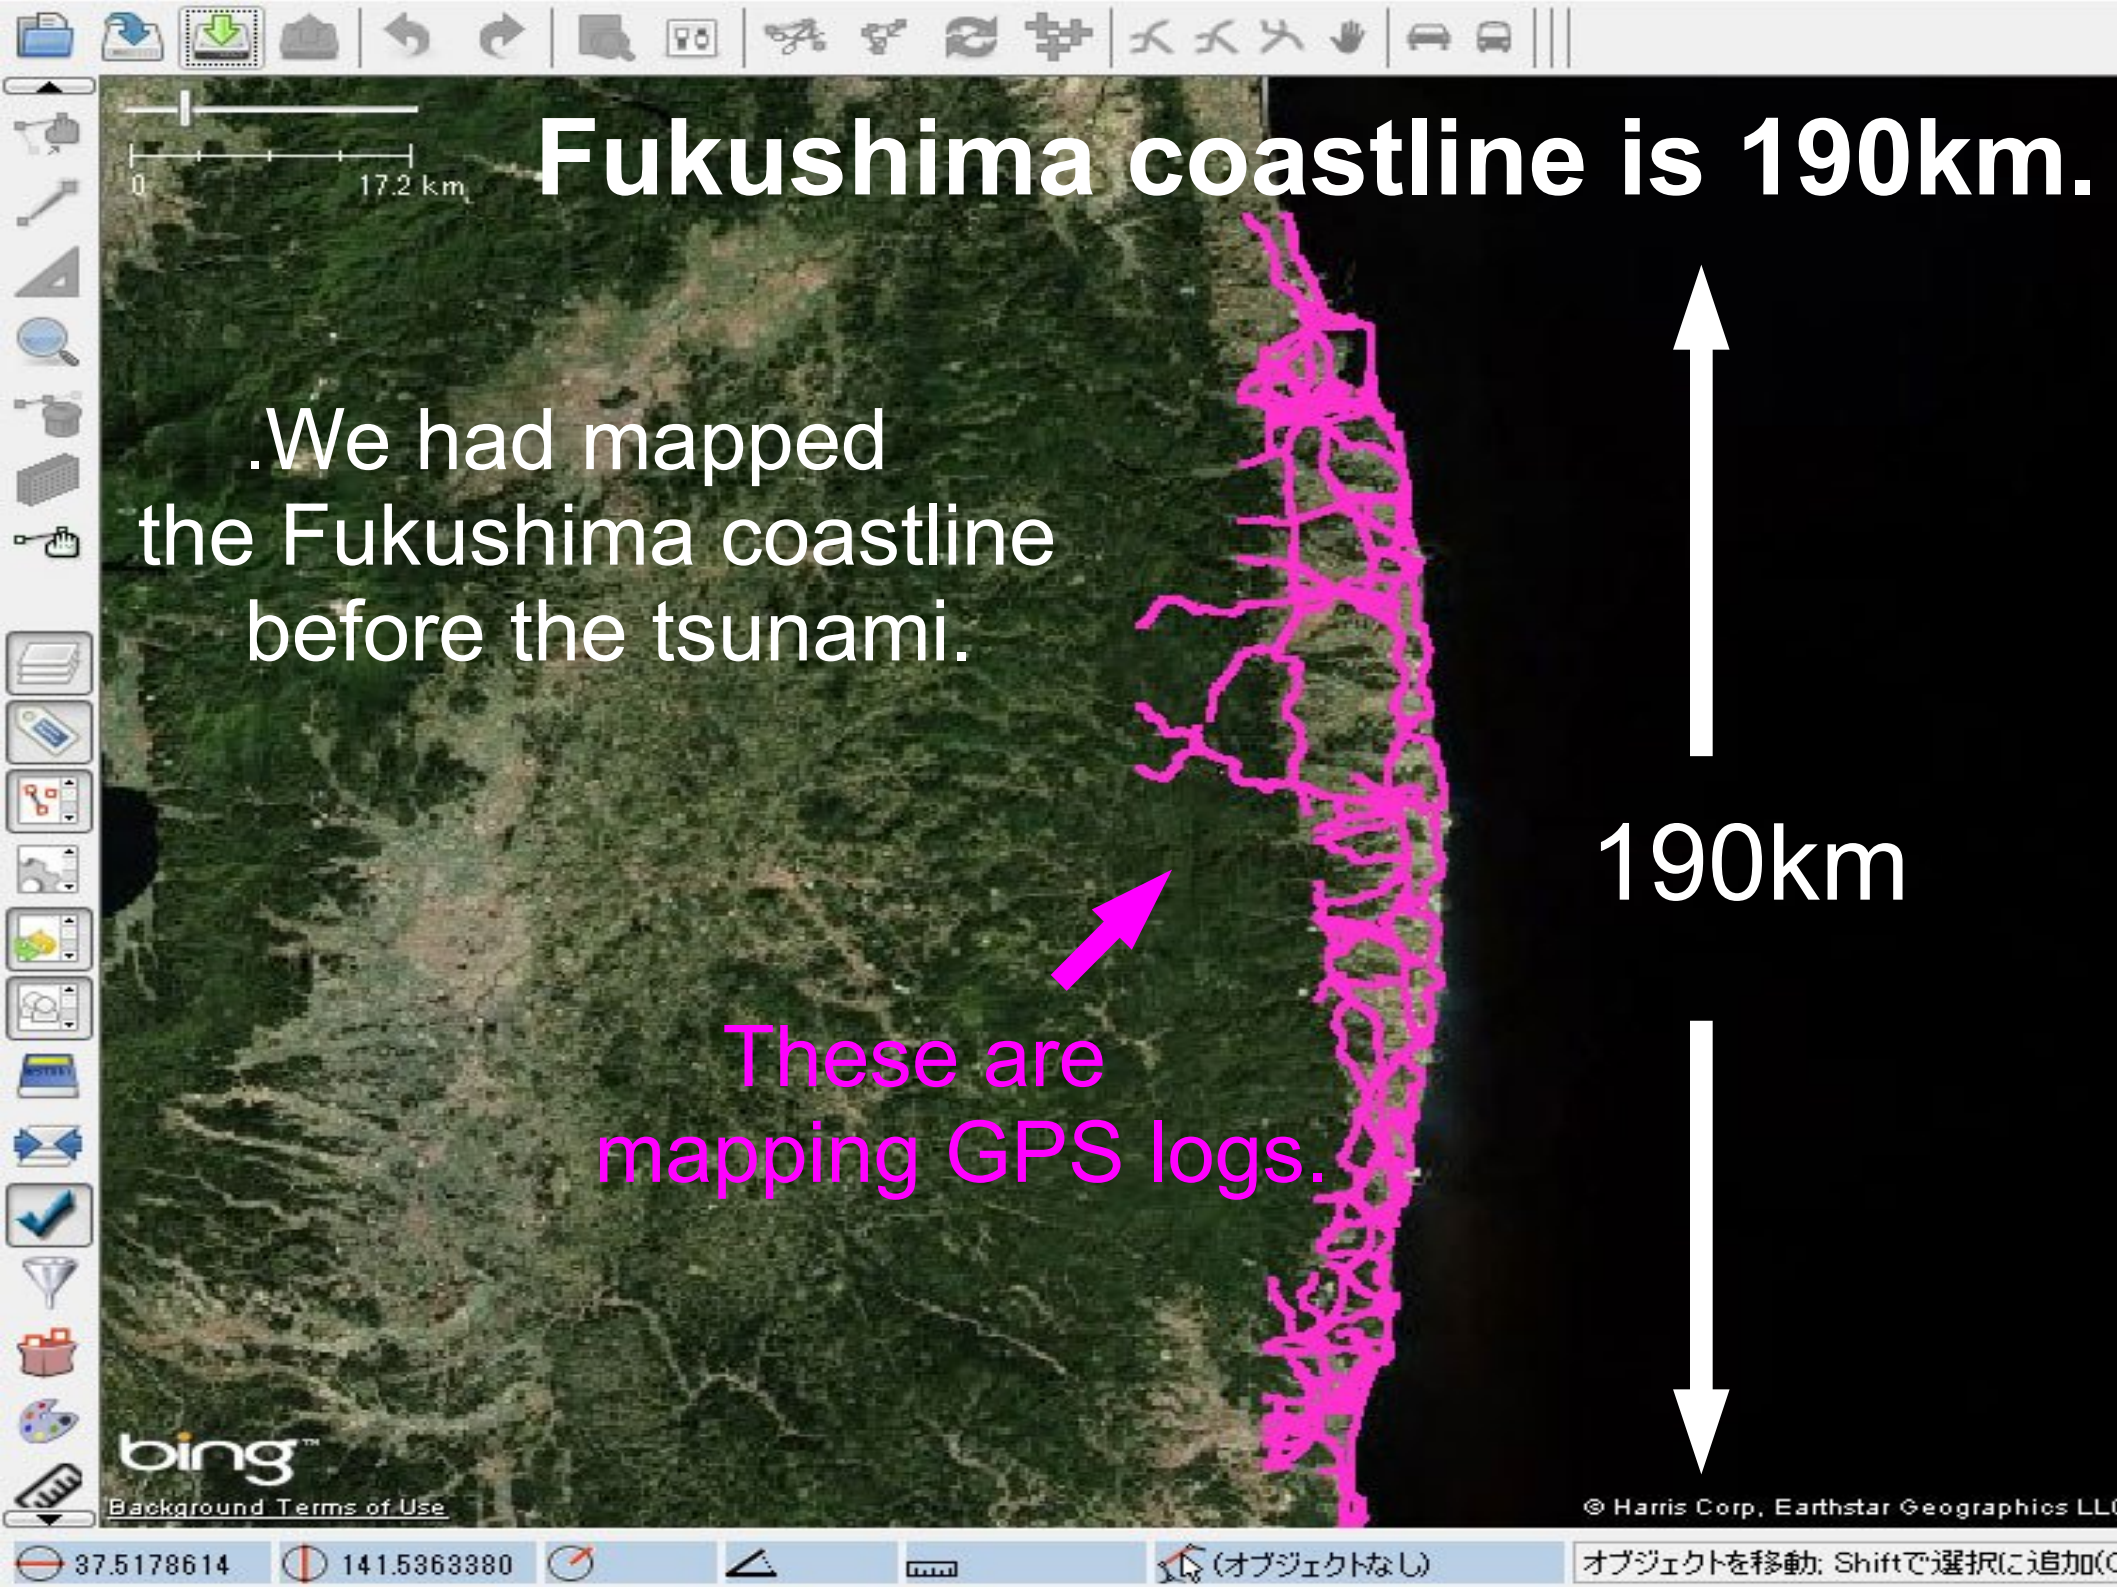

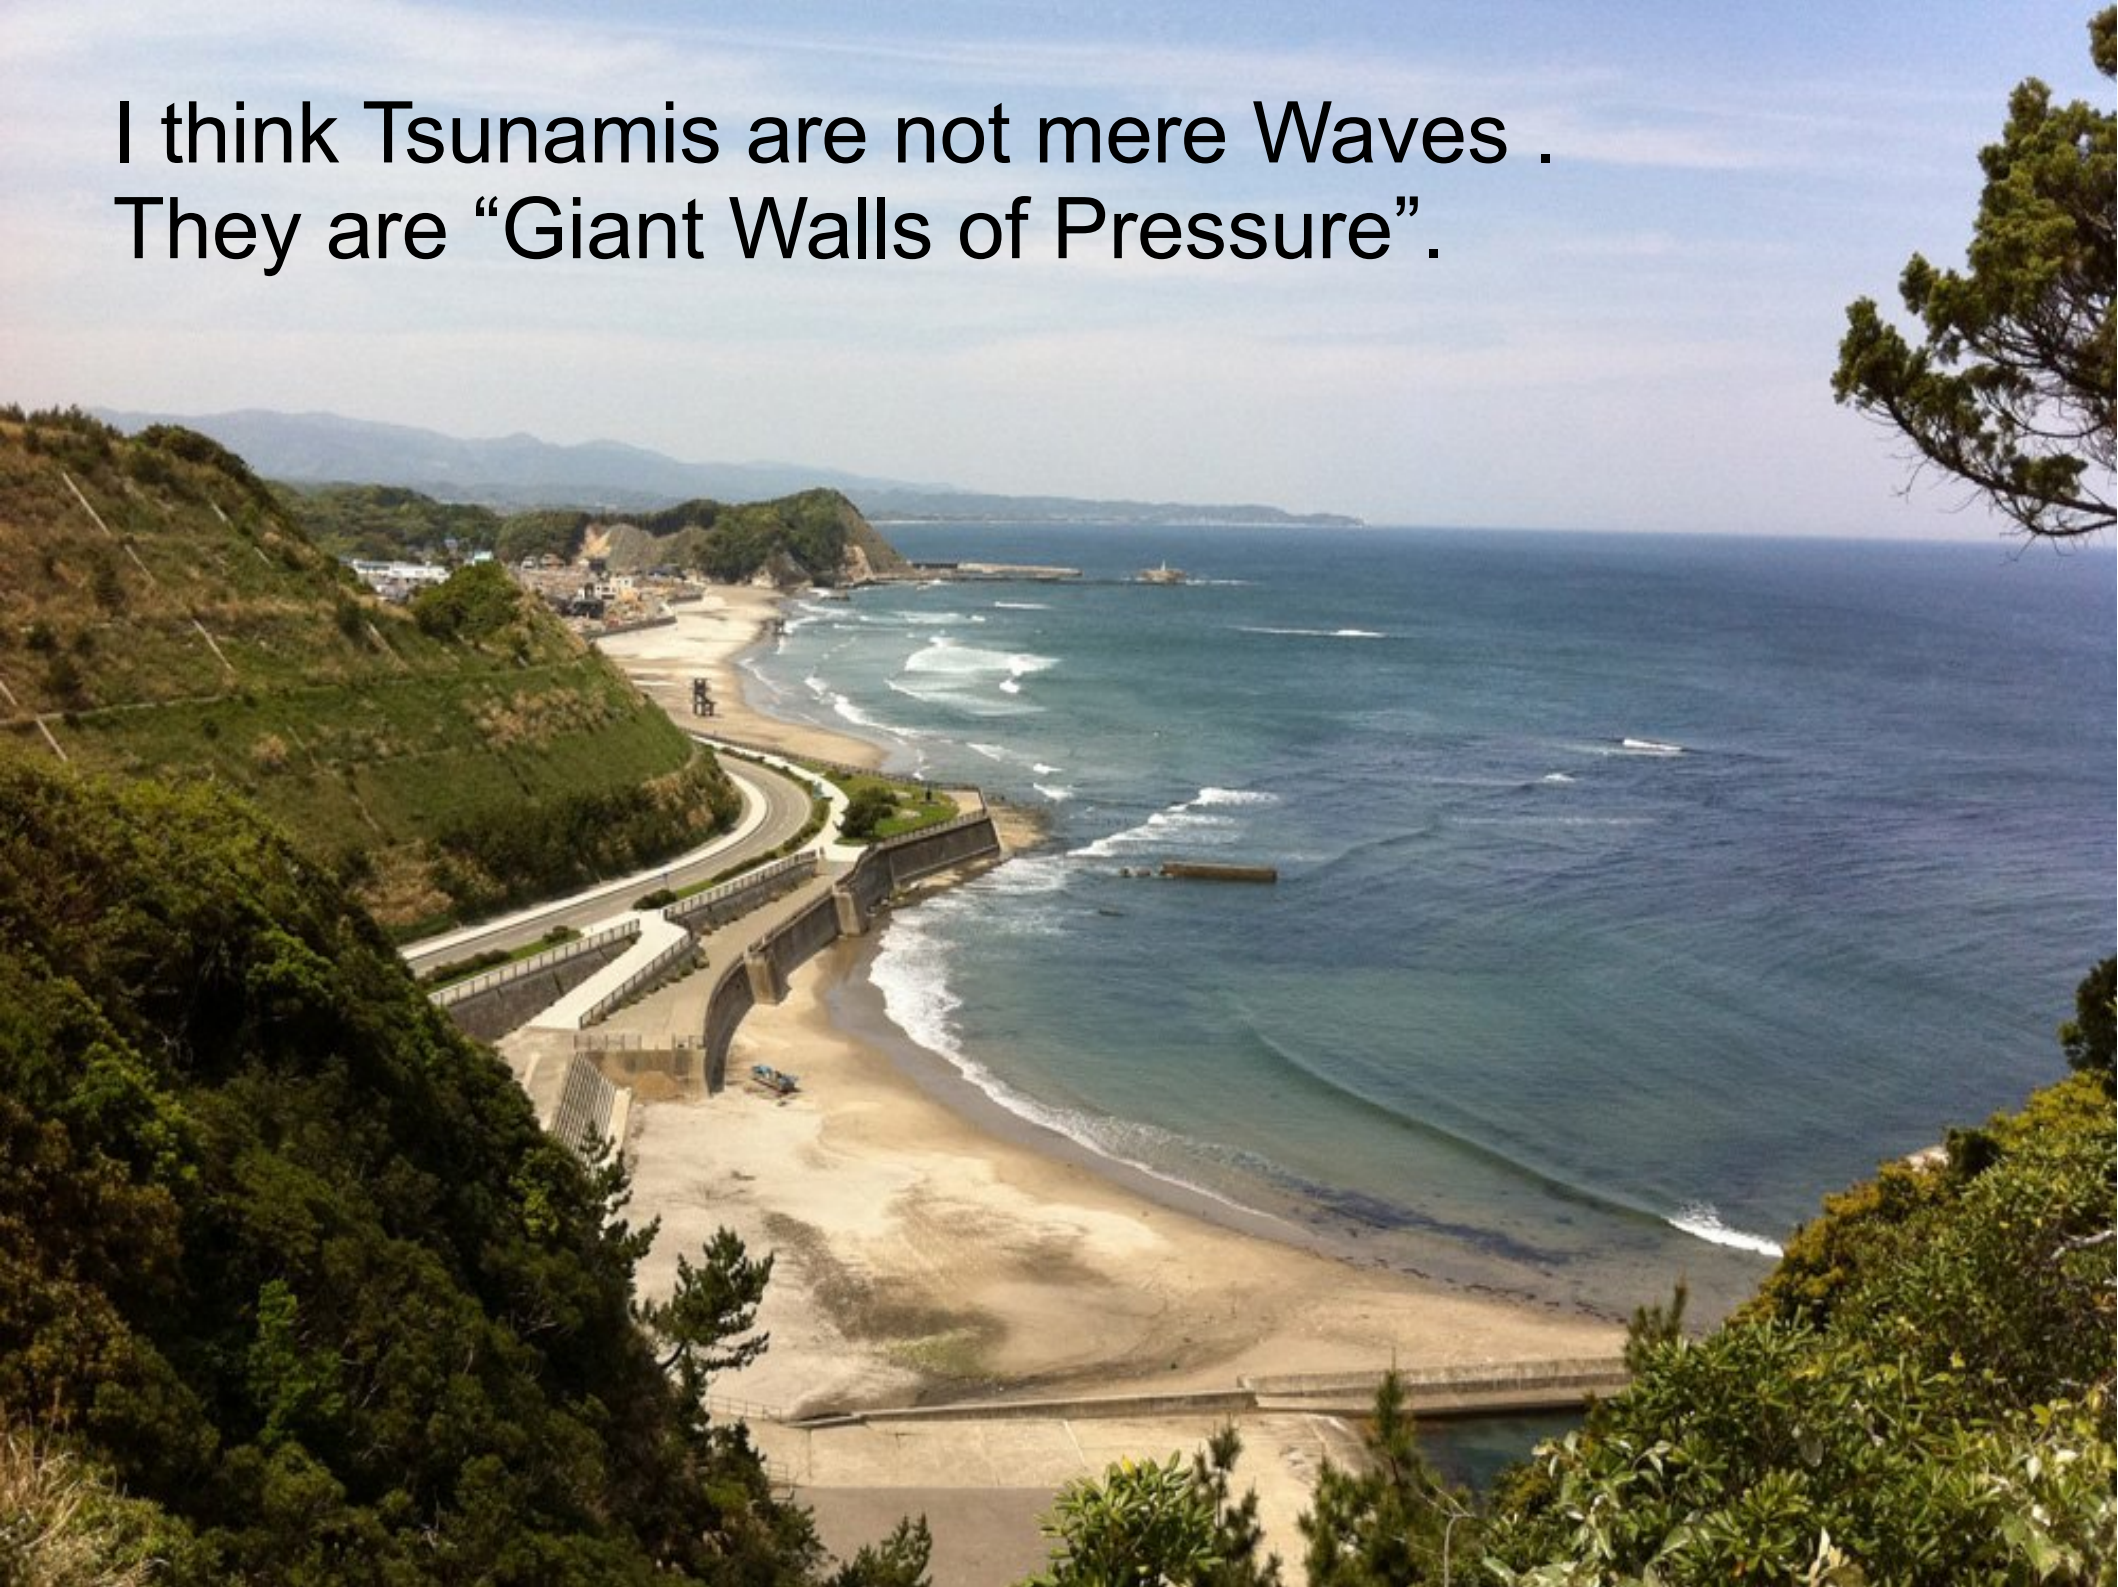

I have always been interested in crisis mapping. However becoming a disaster victim myself has made me realise that I can only do so much as “Mapper”.

I am deeply grateful for all the support that has come from other regions.
We are faced with a difficult situation, but we live in hope.
Tsunami damage area
Sendai City, Miyagi

Tsunami damage

Fukushima coastline is 190km.
0
17.2 km
.We had mapped
the Fukushima coastline
before the tsunami.

I think Tsunamis are not mere Waves .
They are “Giant Walls of Pressure”.

The tsunami destroyed everything.
And the receding wave carried
much of the debris out to sea.

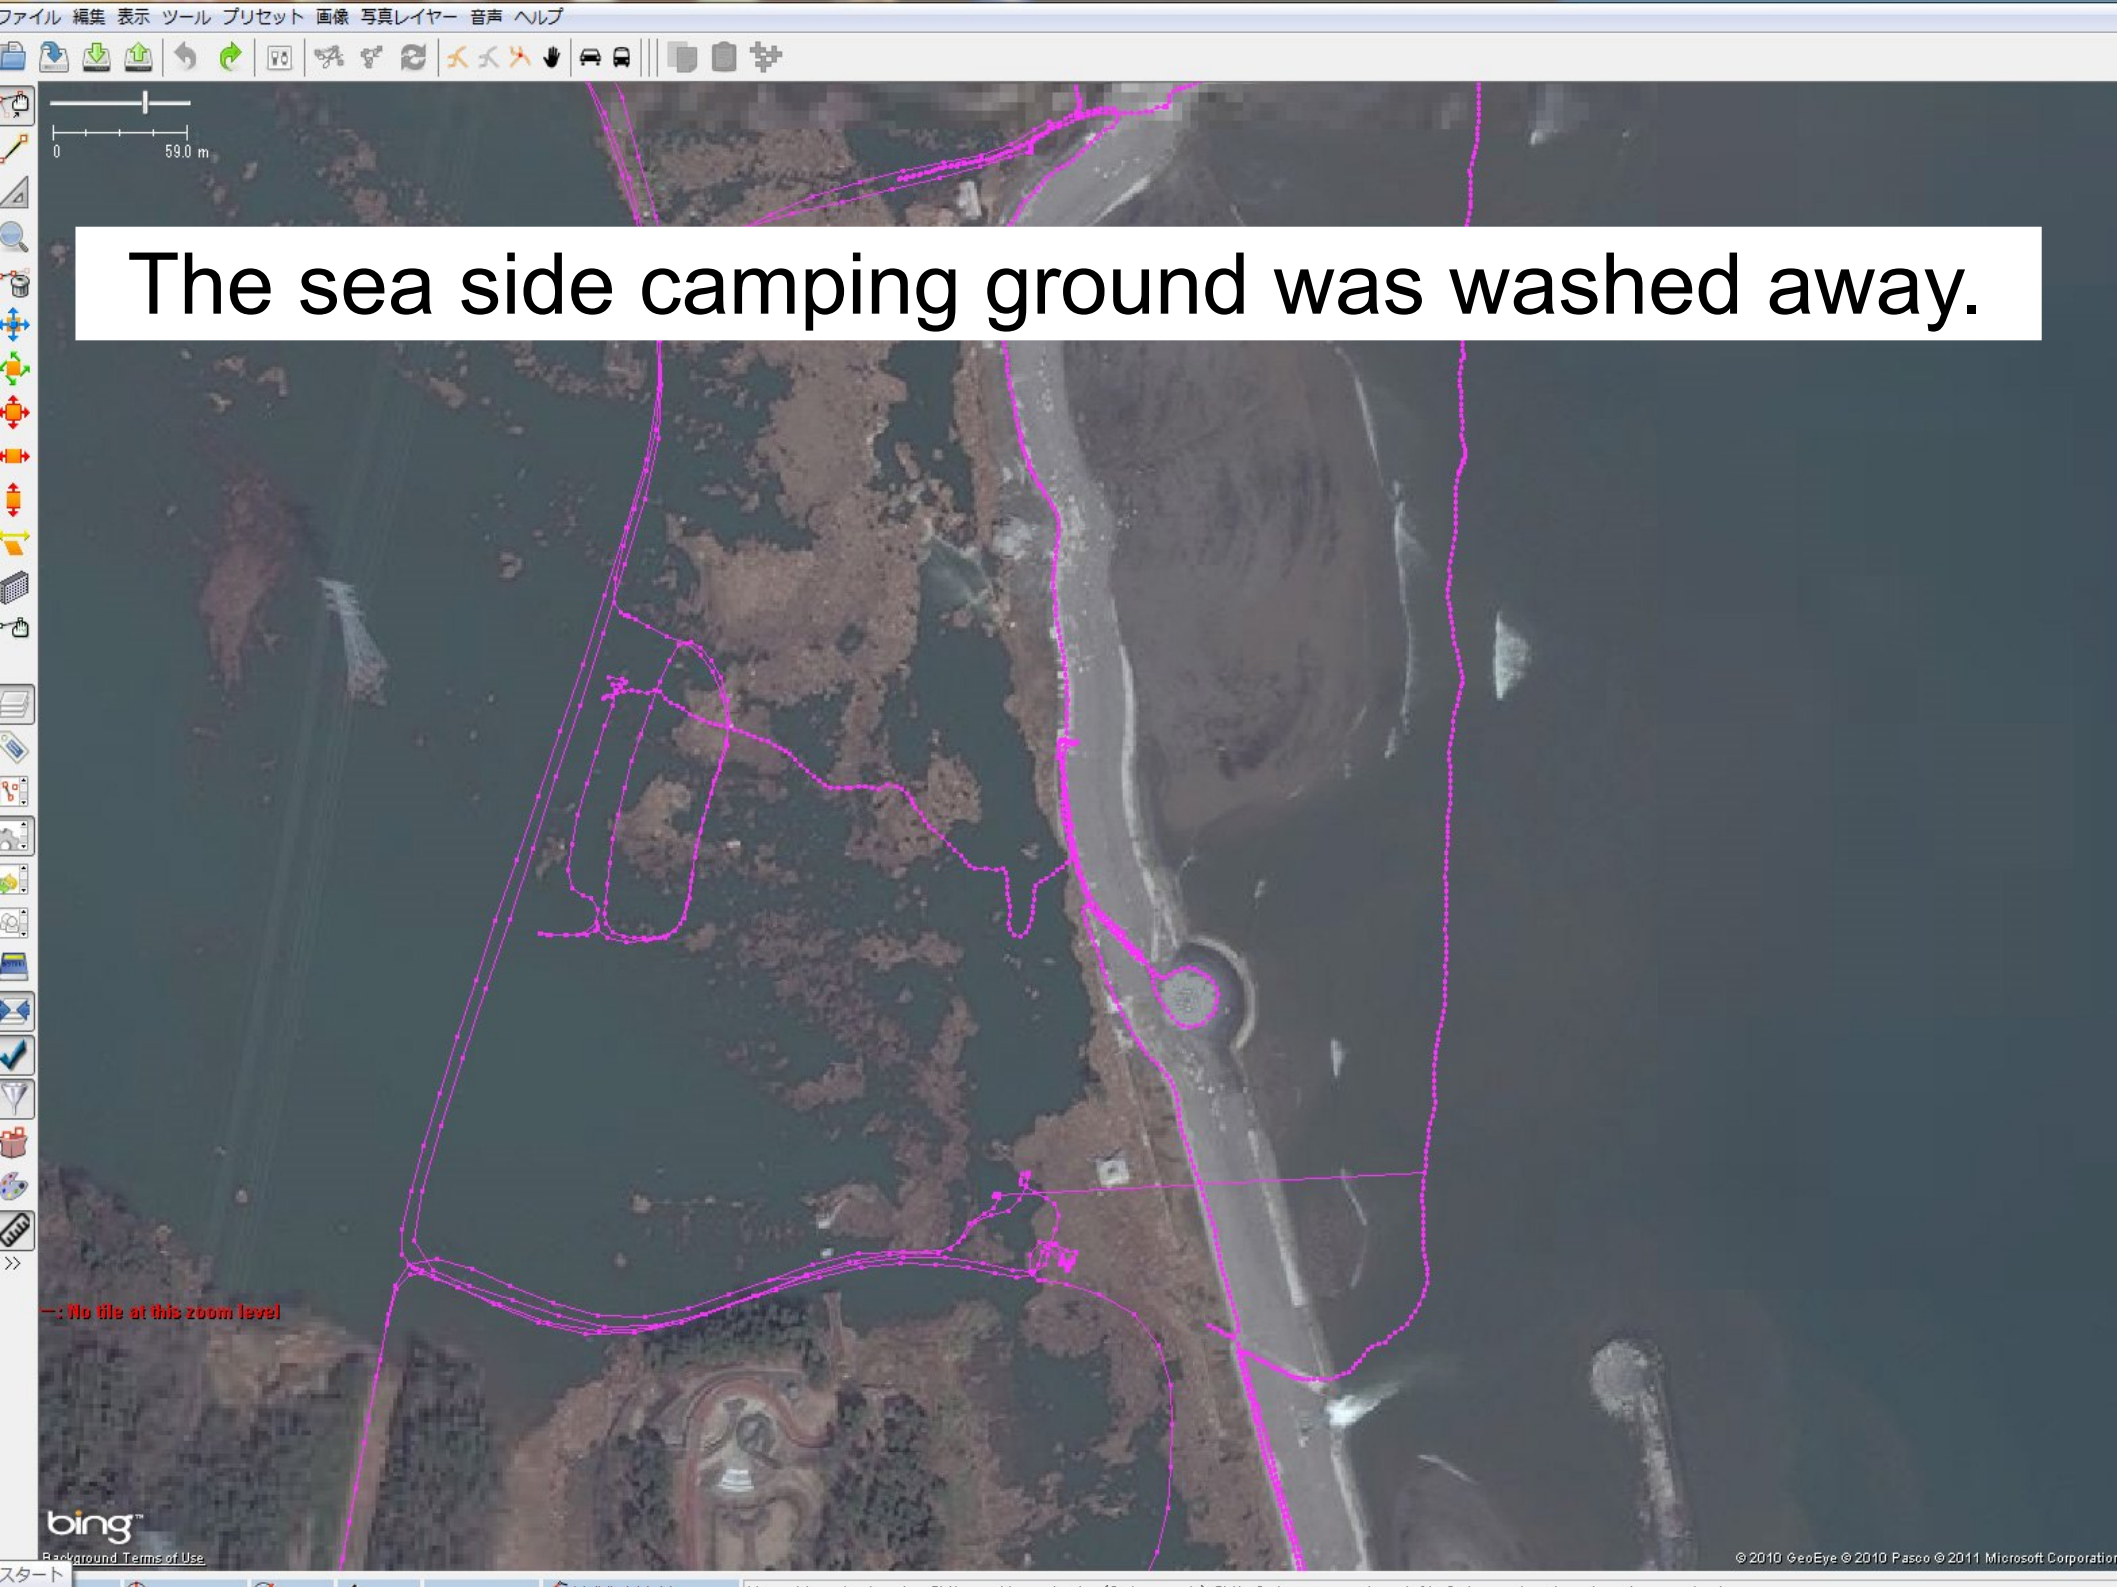

Tsunami Water Level

Even after four months,a lot of debris still remains.

The goverment and volunteers
are warking to remove it.

This is some of the debris
that has been collected.

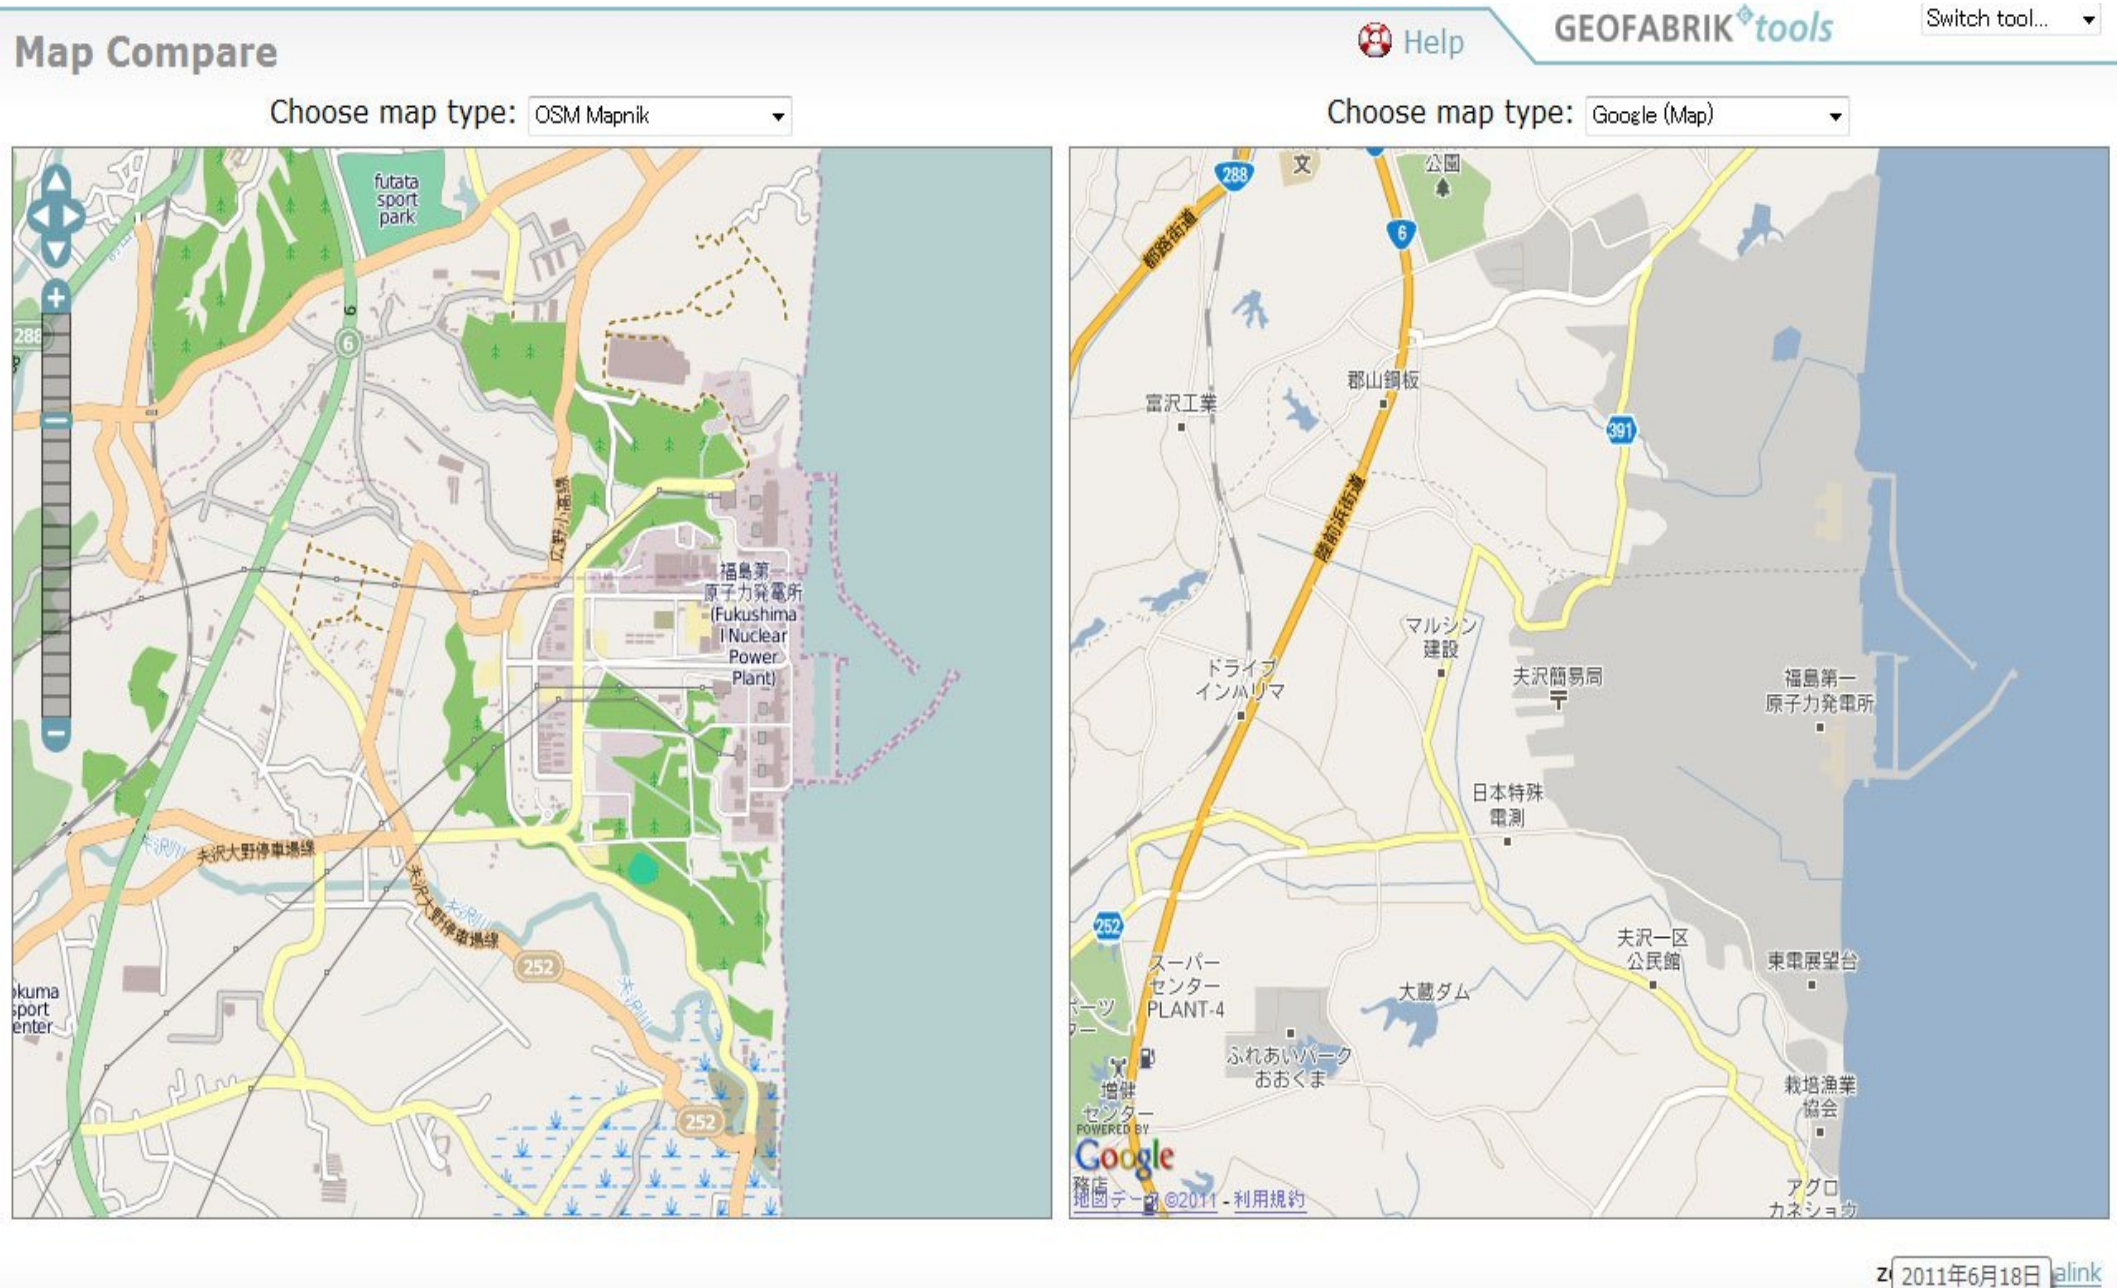

The sea side camping ground was washed away.

Nuclear Disaster

A nuclear accident followed the earthquake and tsunami. Many mappers mapped the Fukushima nuclear power plant.

Following the accident citizens were not made aware of the distribution of radiation.
The measurement and release of radiation data by the government was too slow.

I considered mapping the radiation levels in Fukushima.

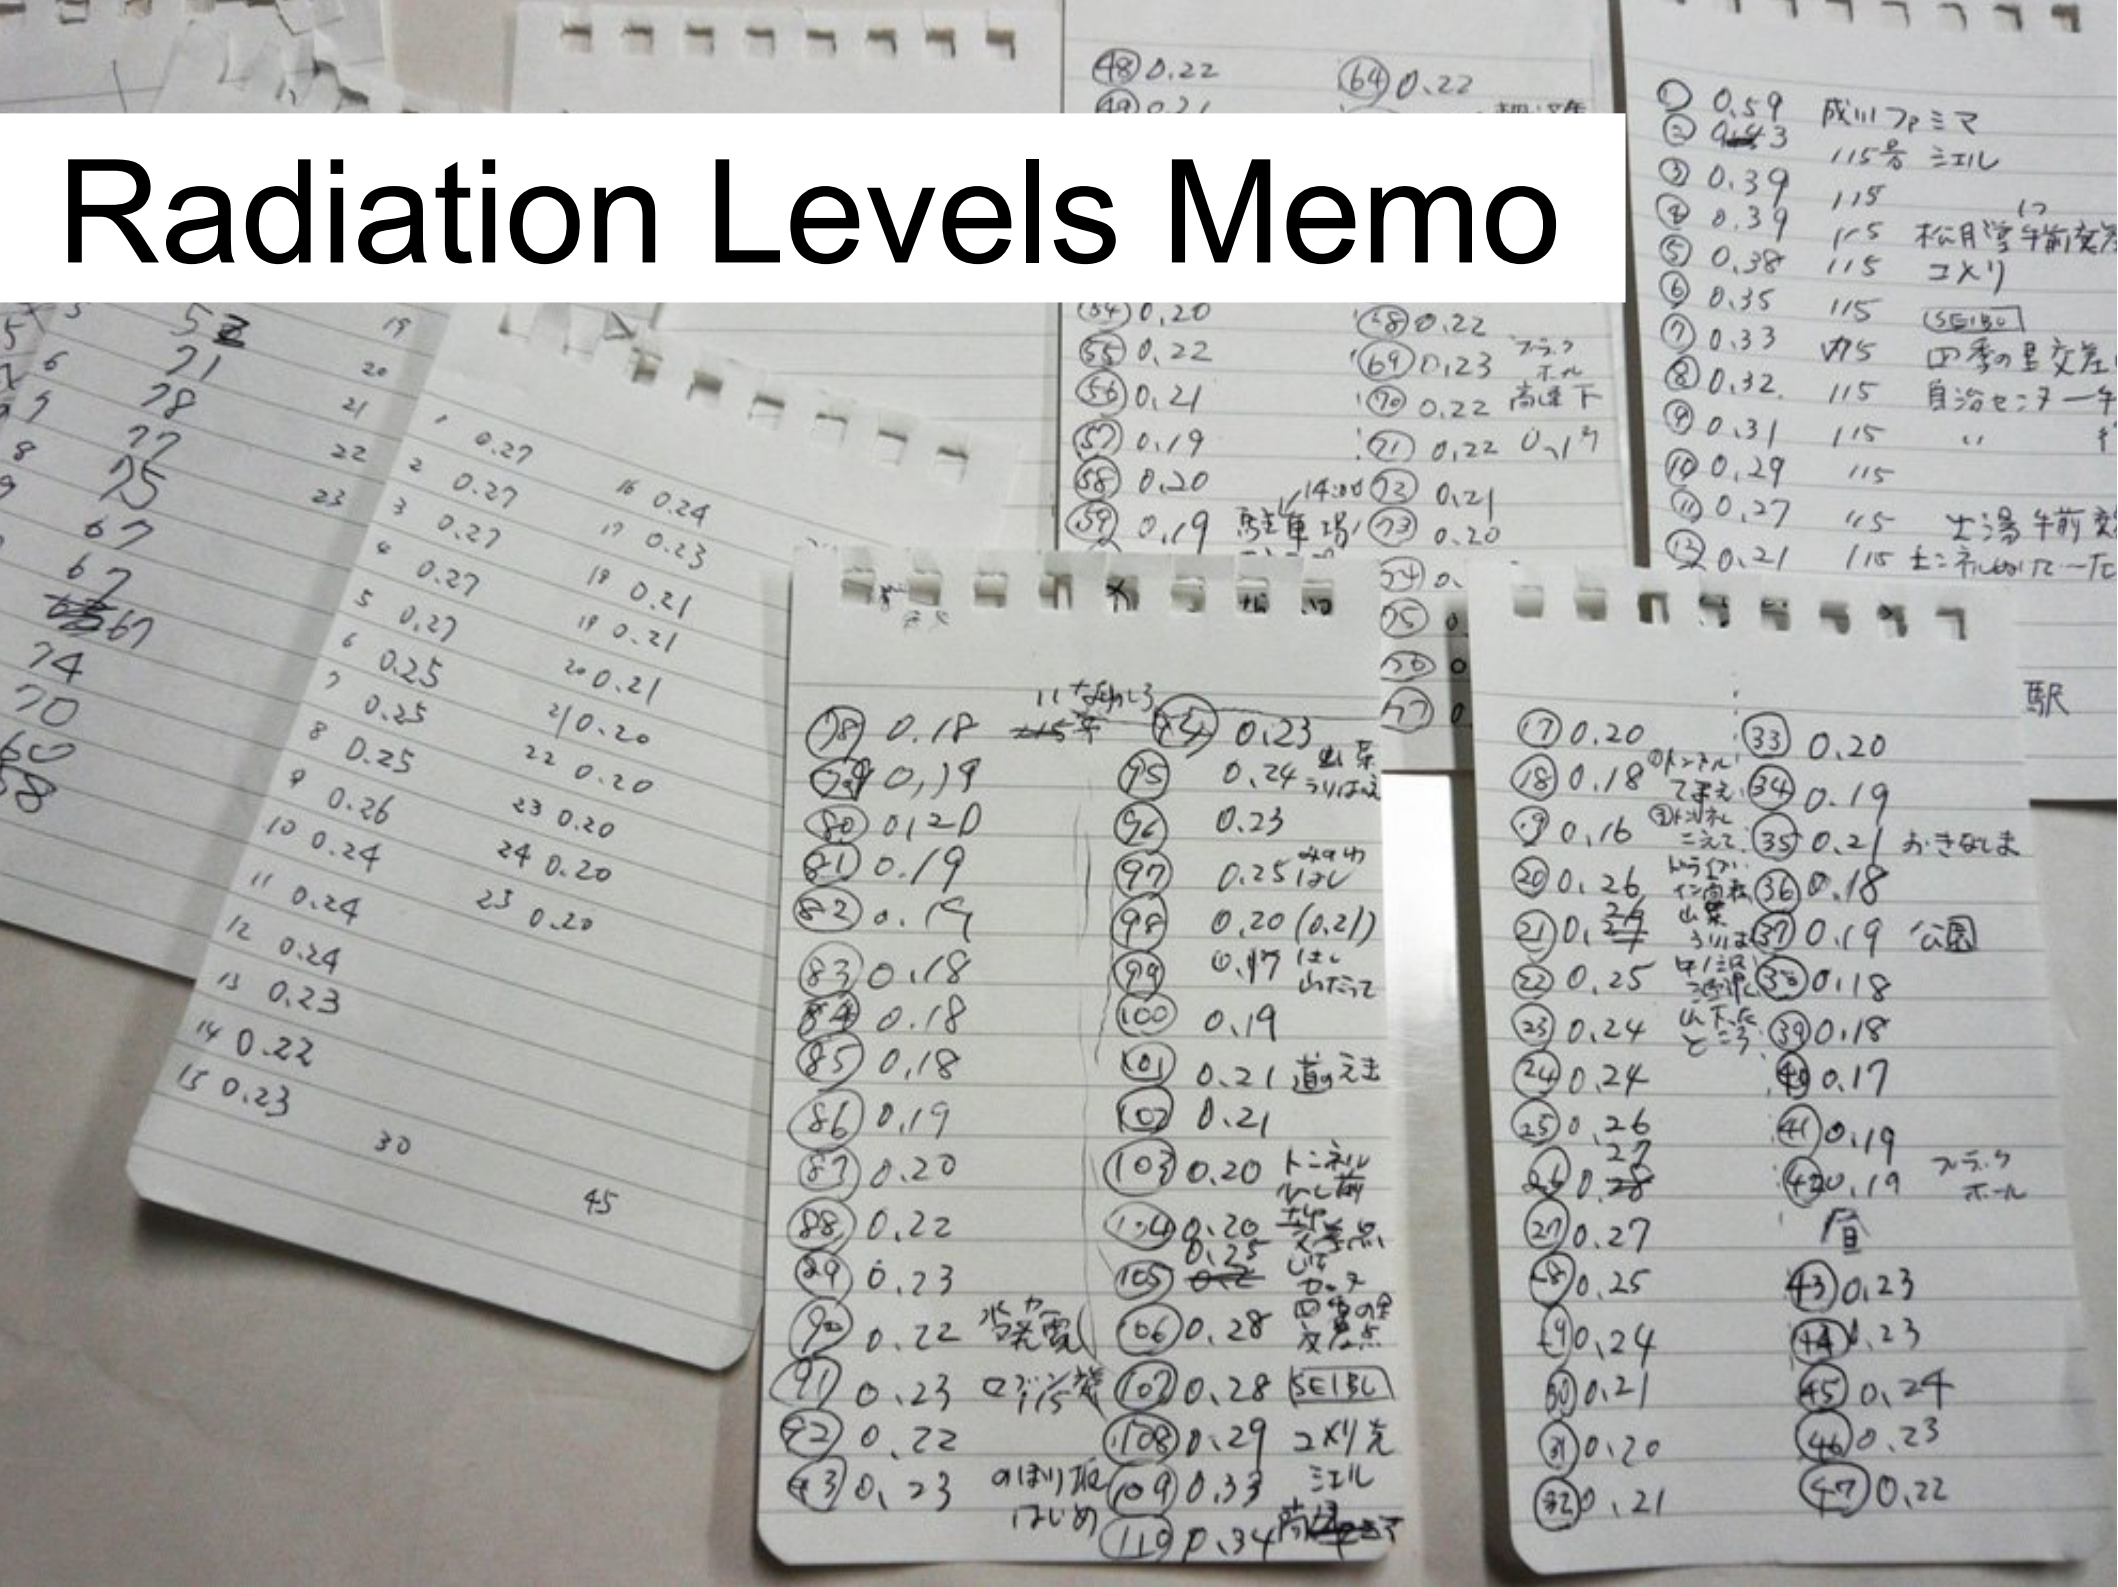

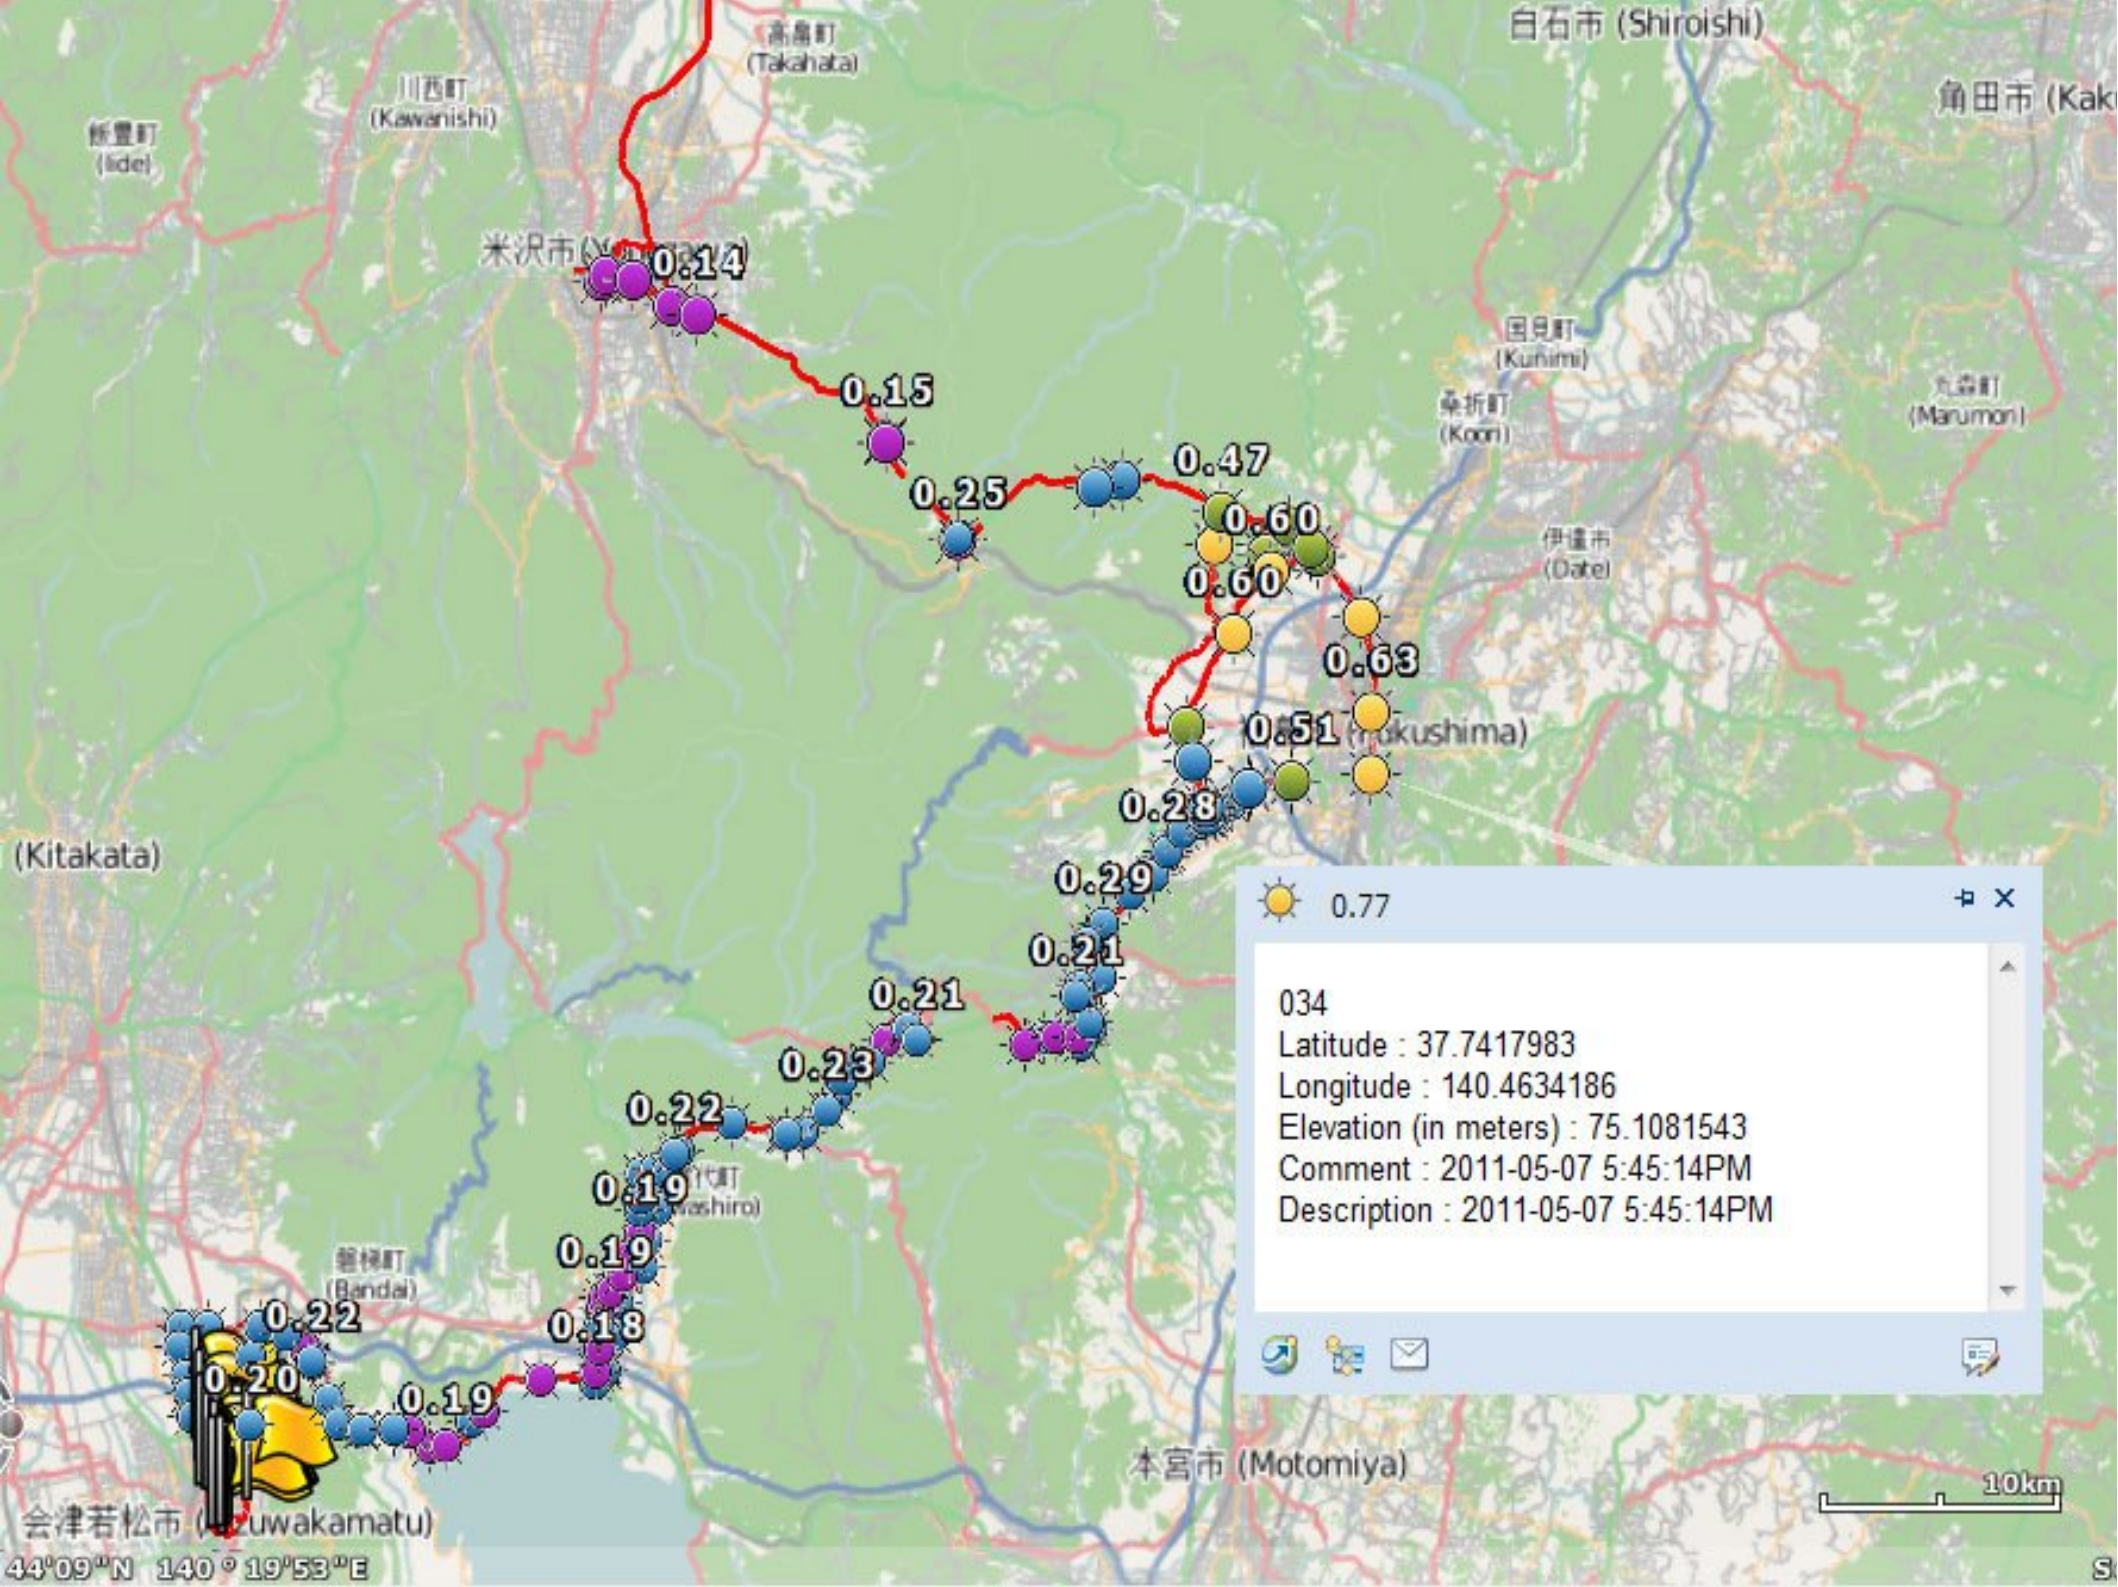

Radiation Mapping

First, I set several waypoints on my GPS
And recorded the levels with Geiger Conuter.

Then, in order to wider the mapping area,
I used the GPS ,Geiger Conuter and **IC recorder** and mapped with my car. (Voice mapping)

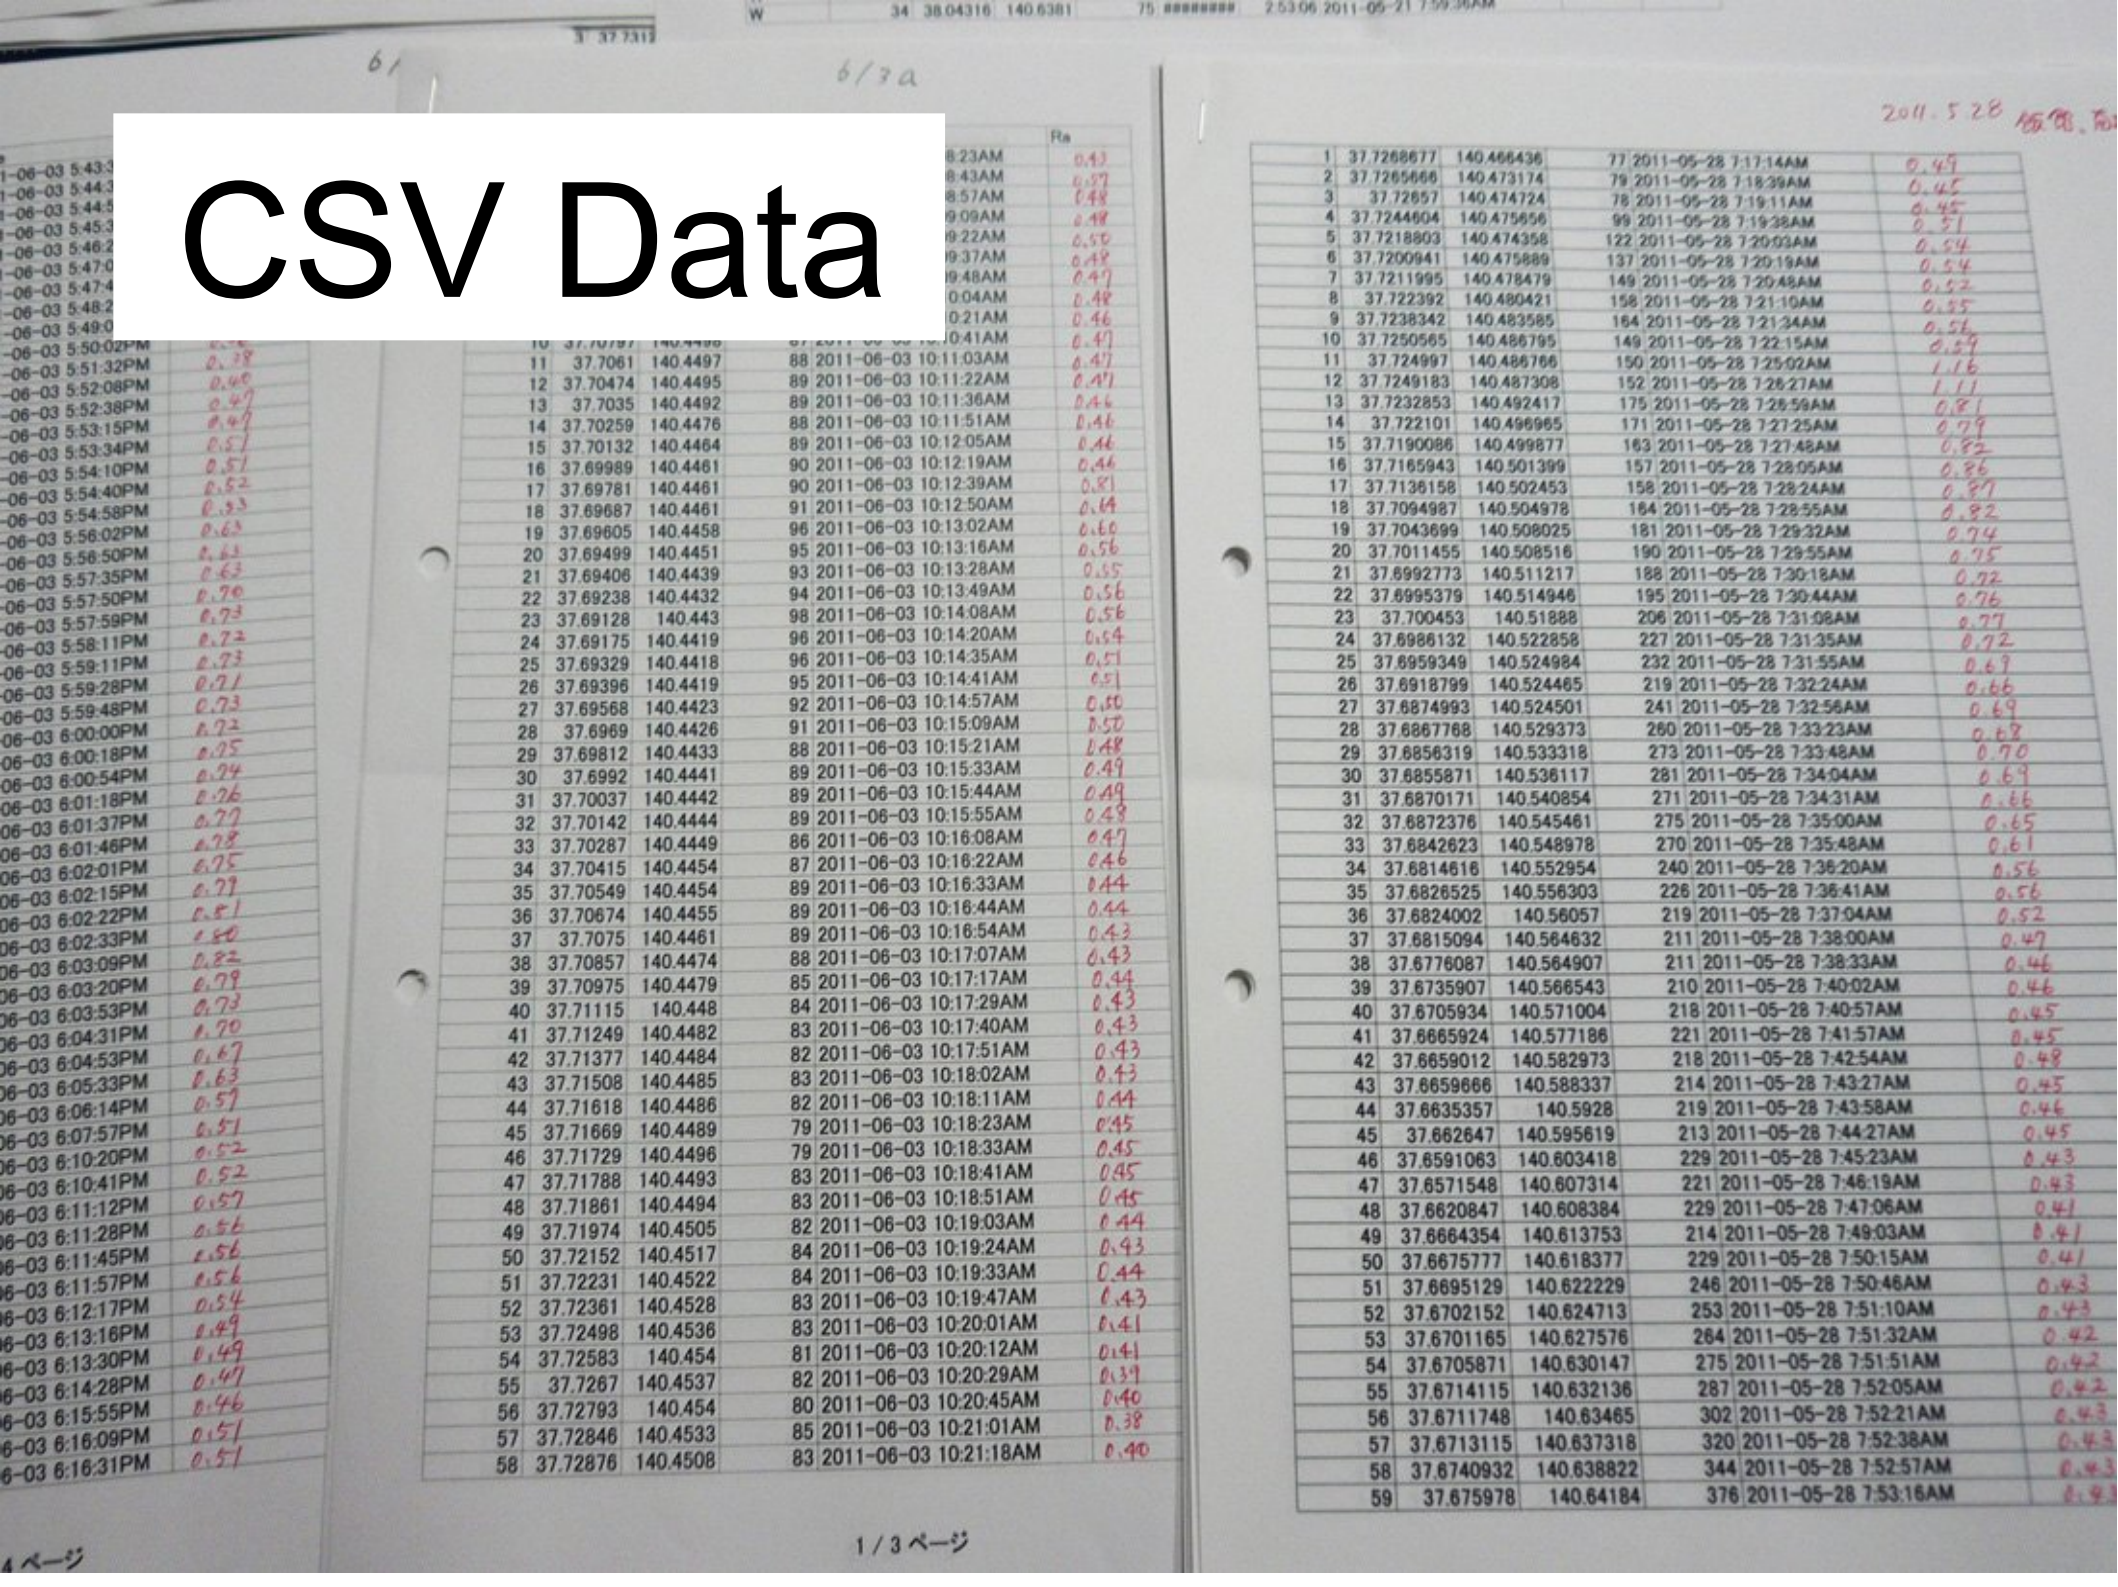

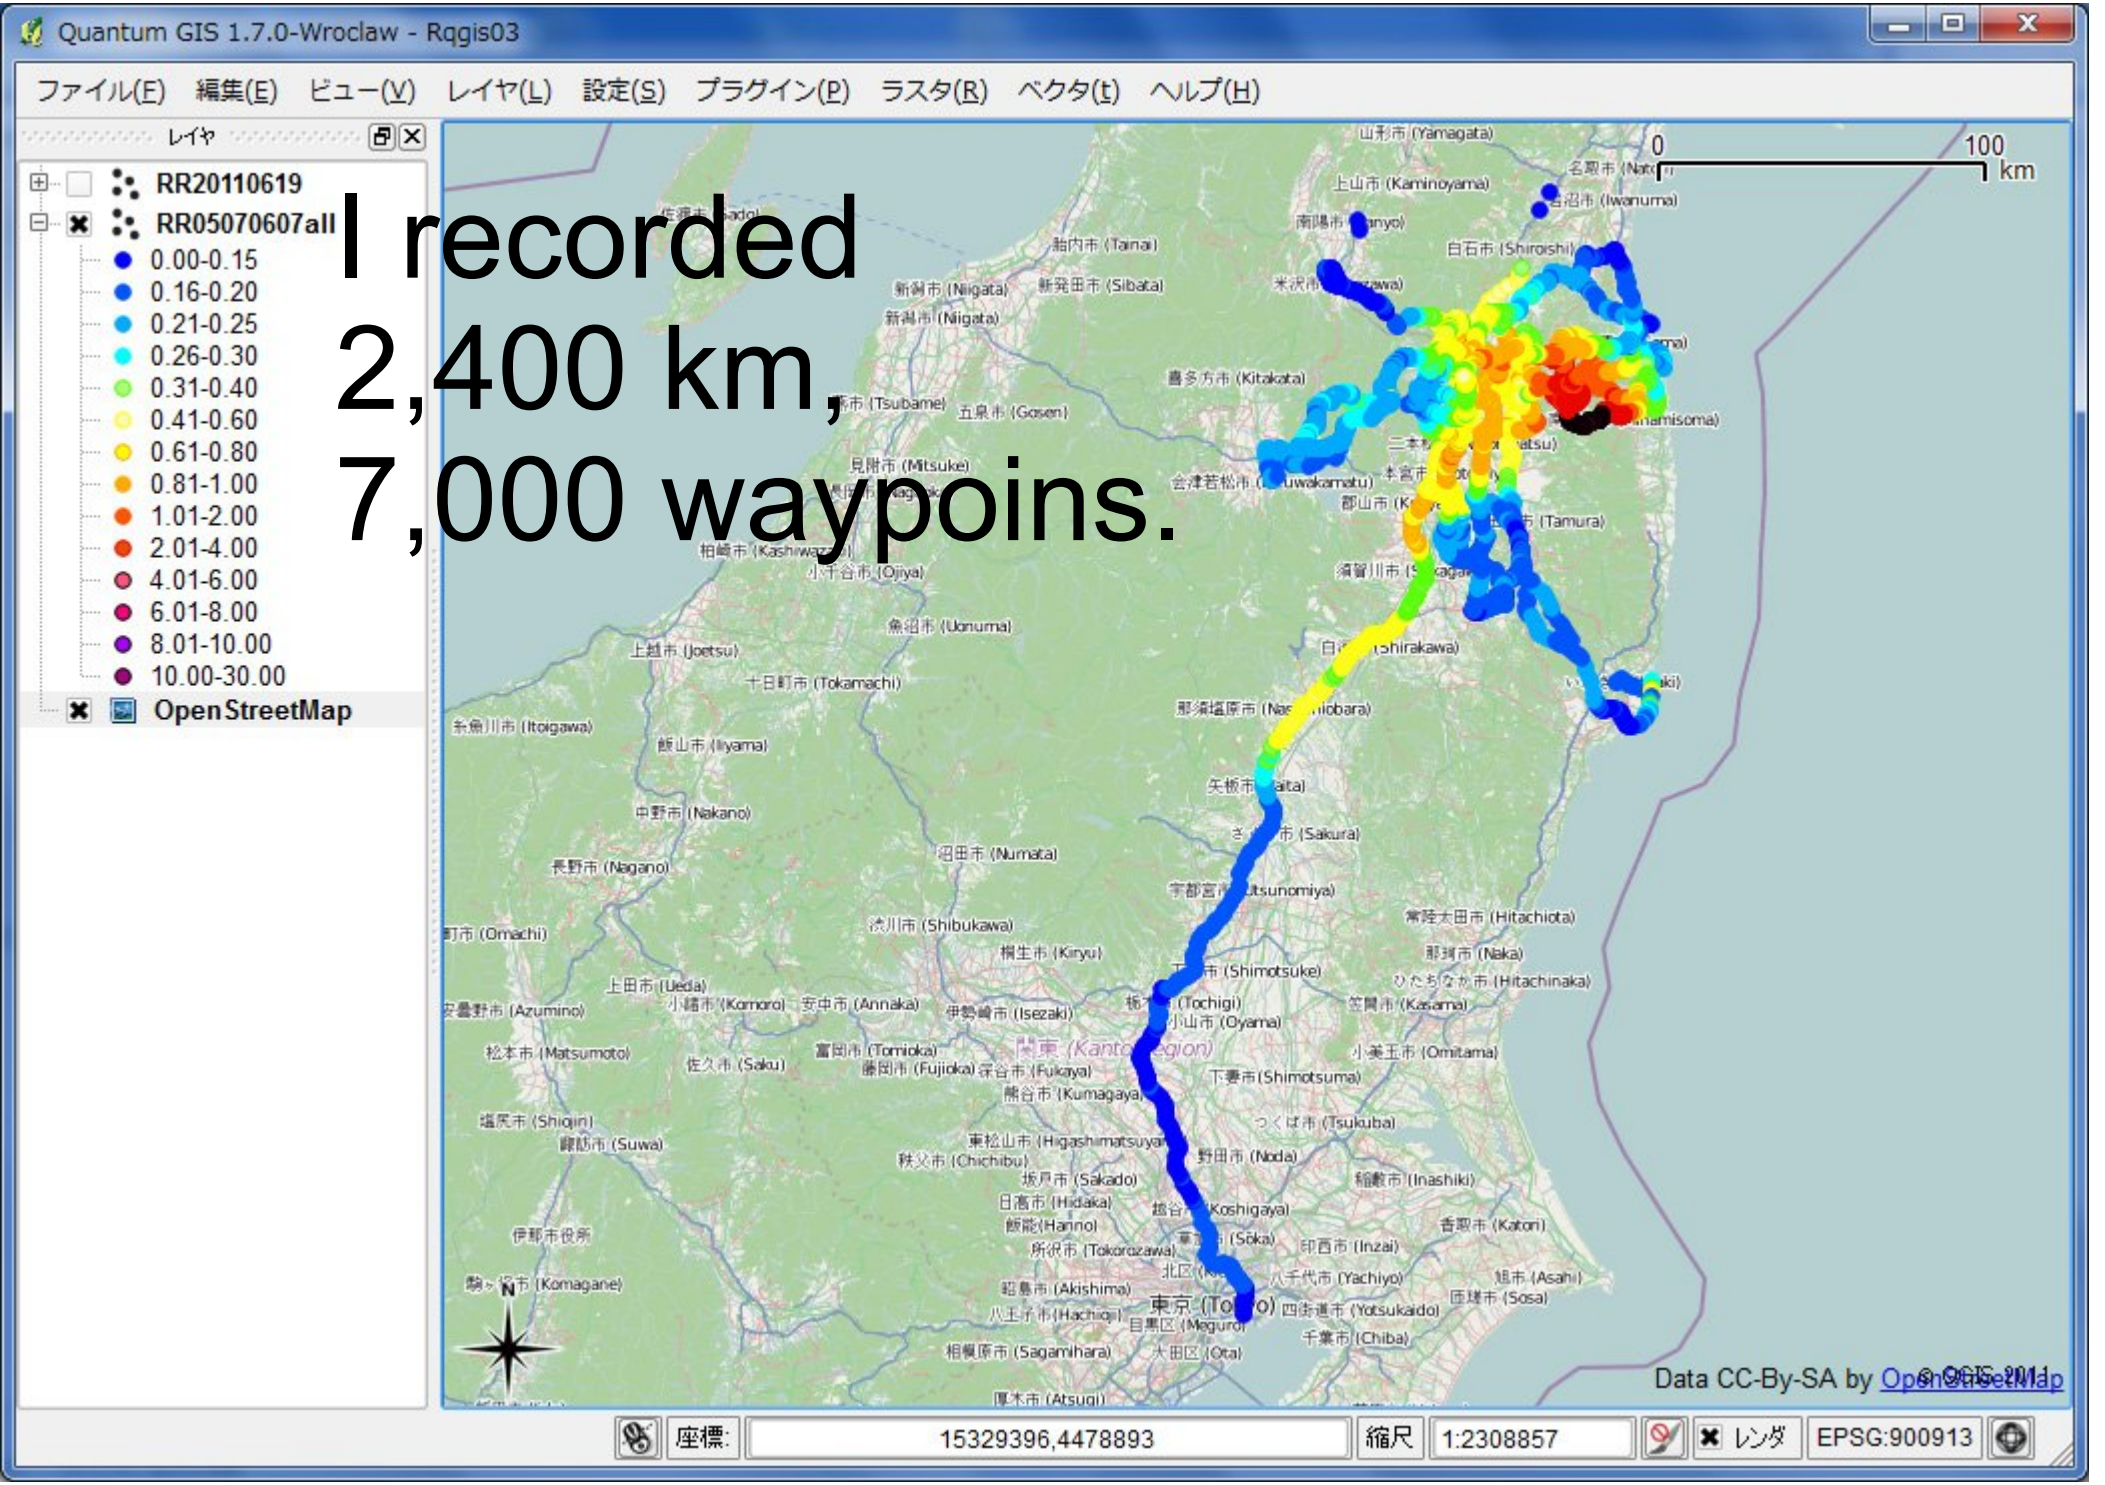

I recorded waypoints and Radiation Levels by voice.

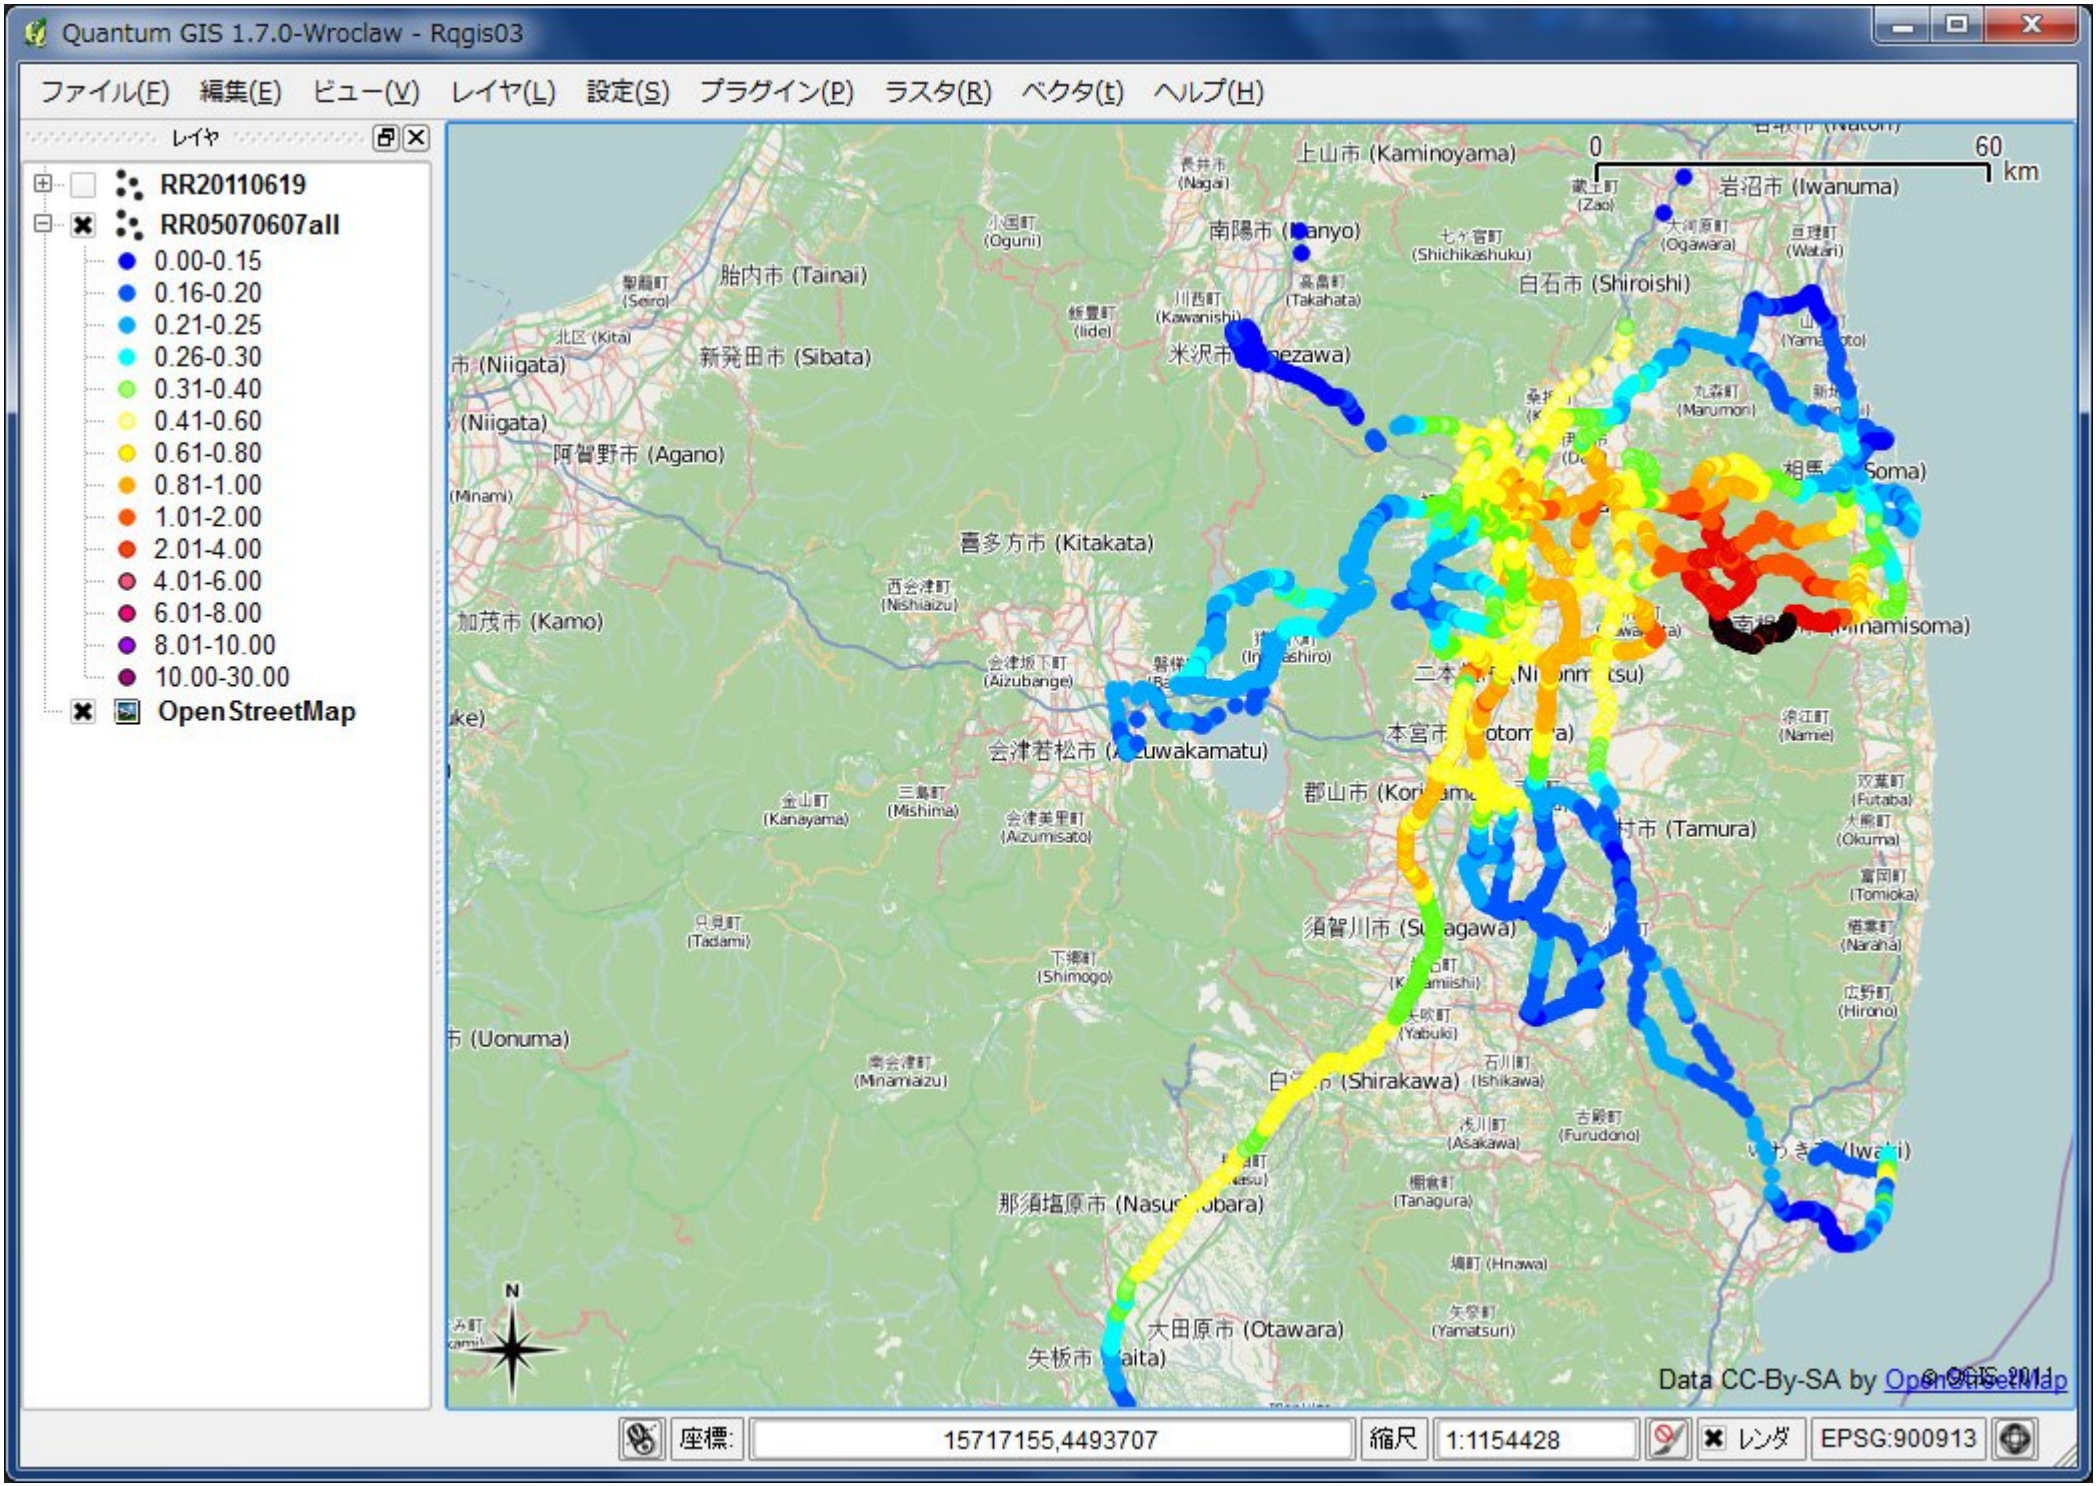

I recorded.

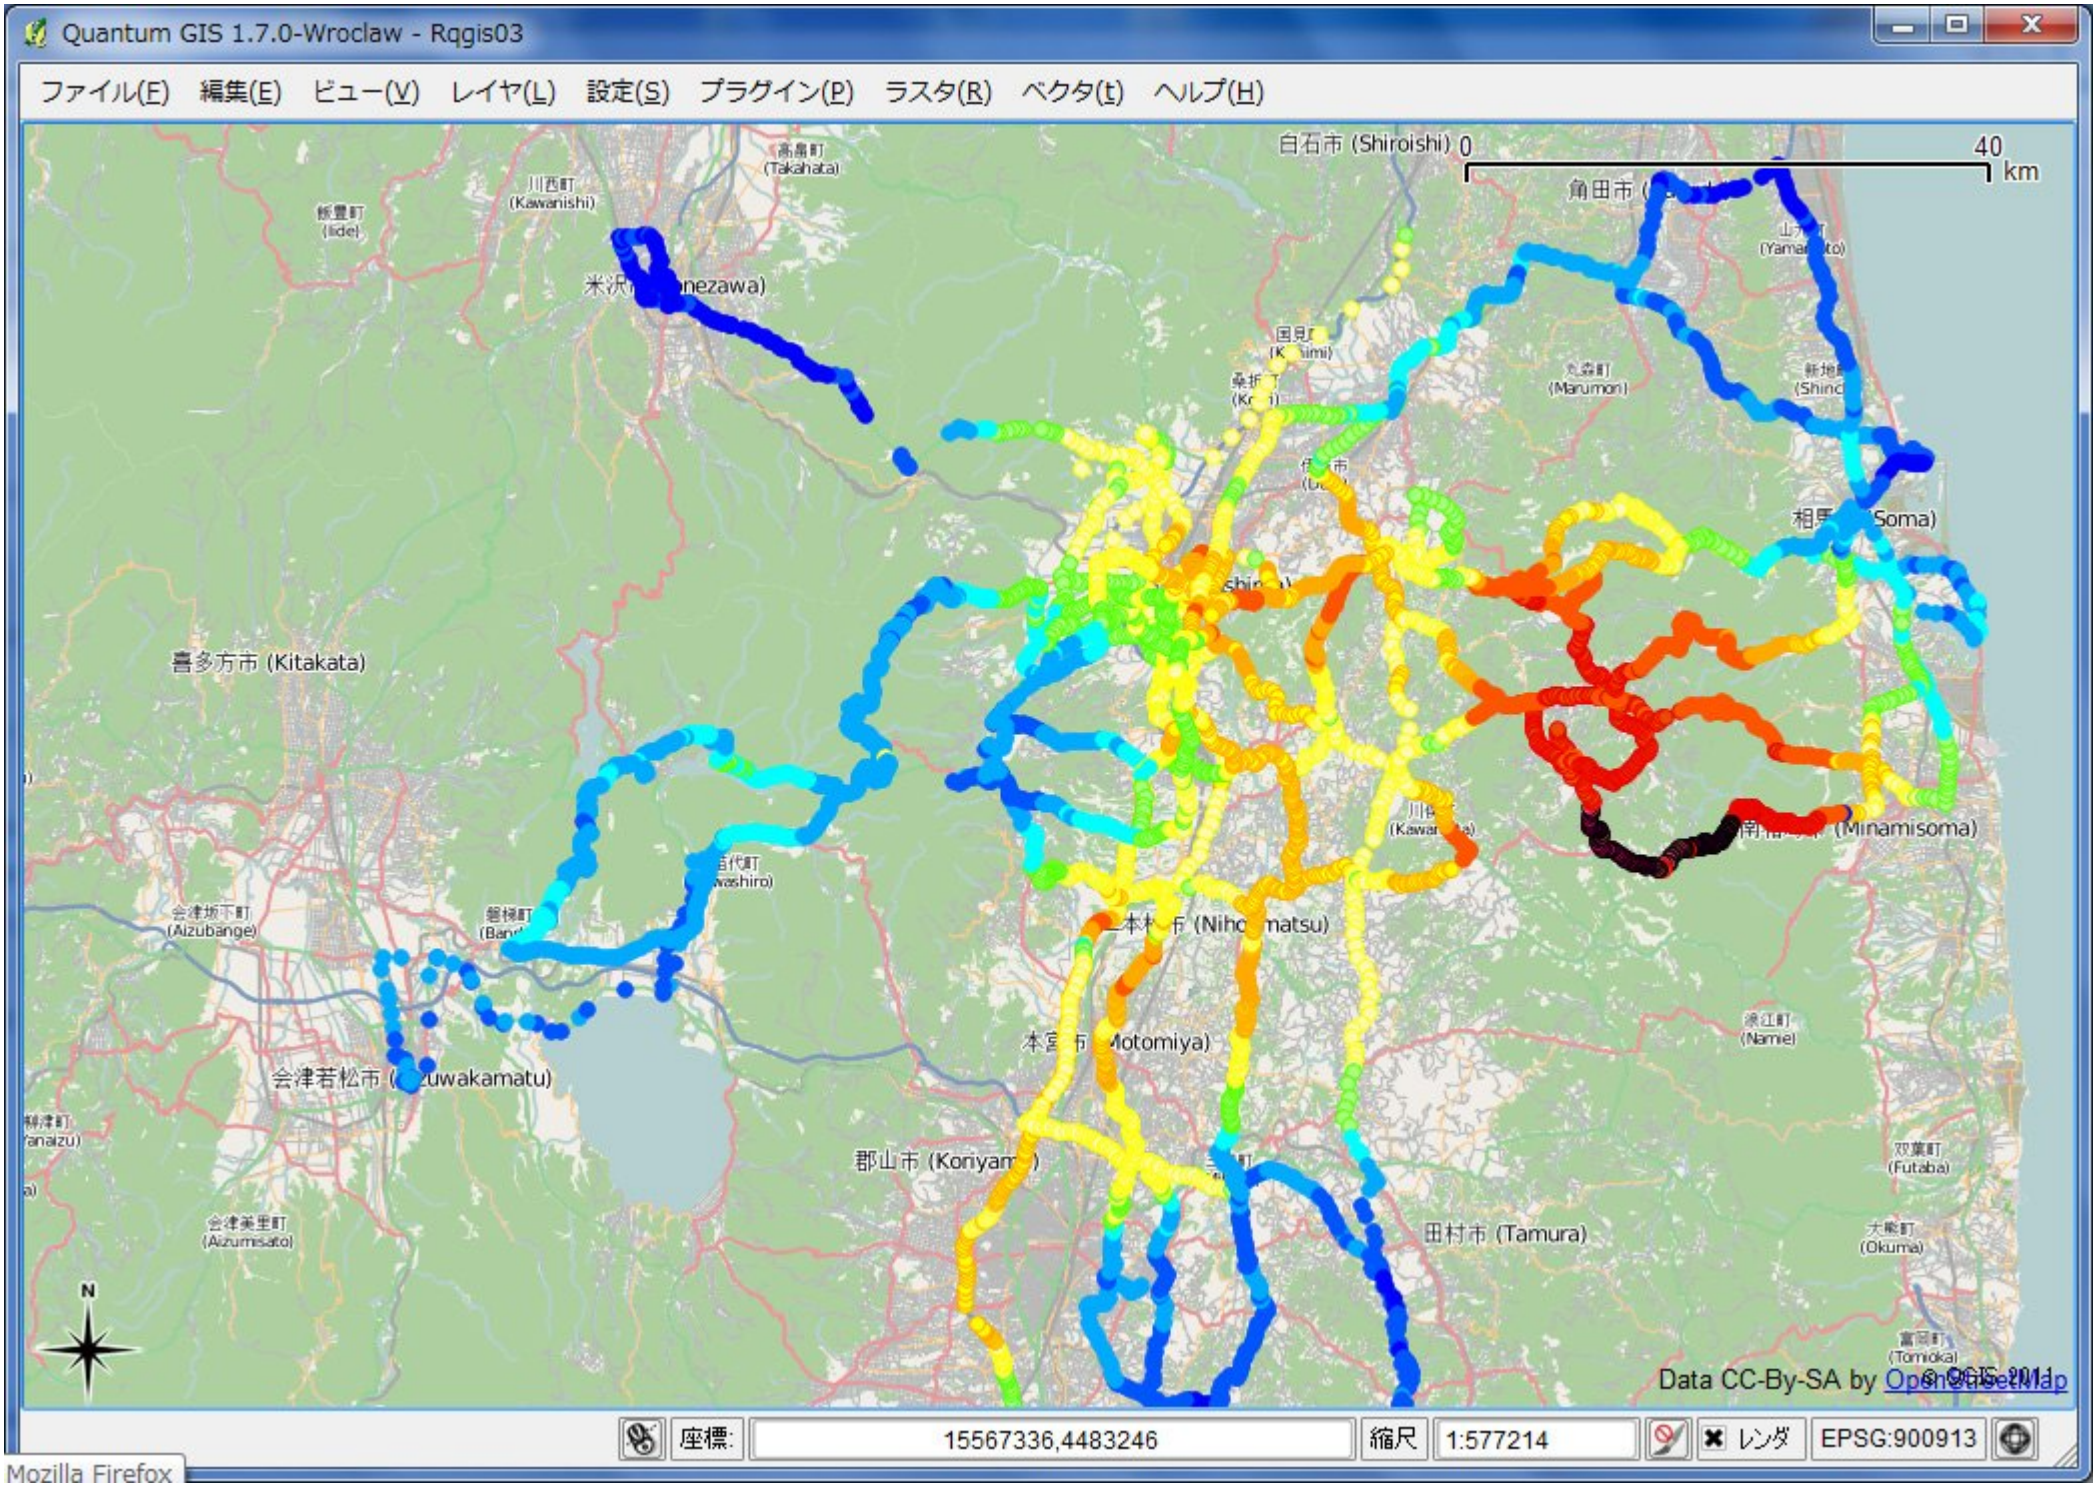

I recorded.

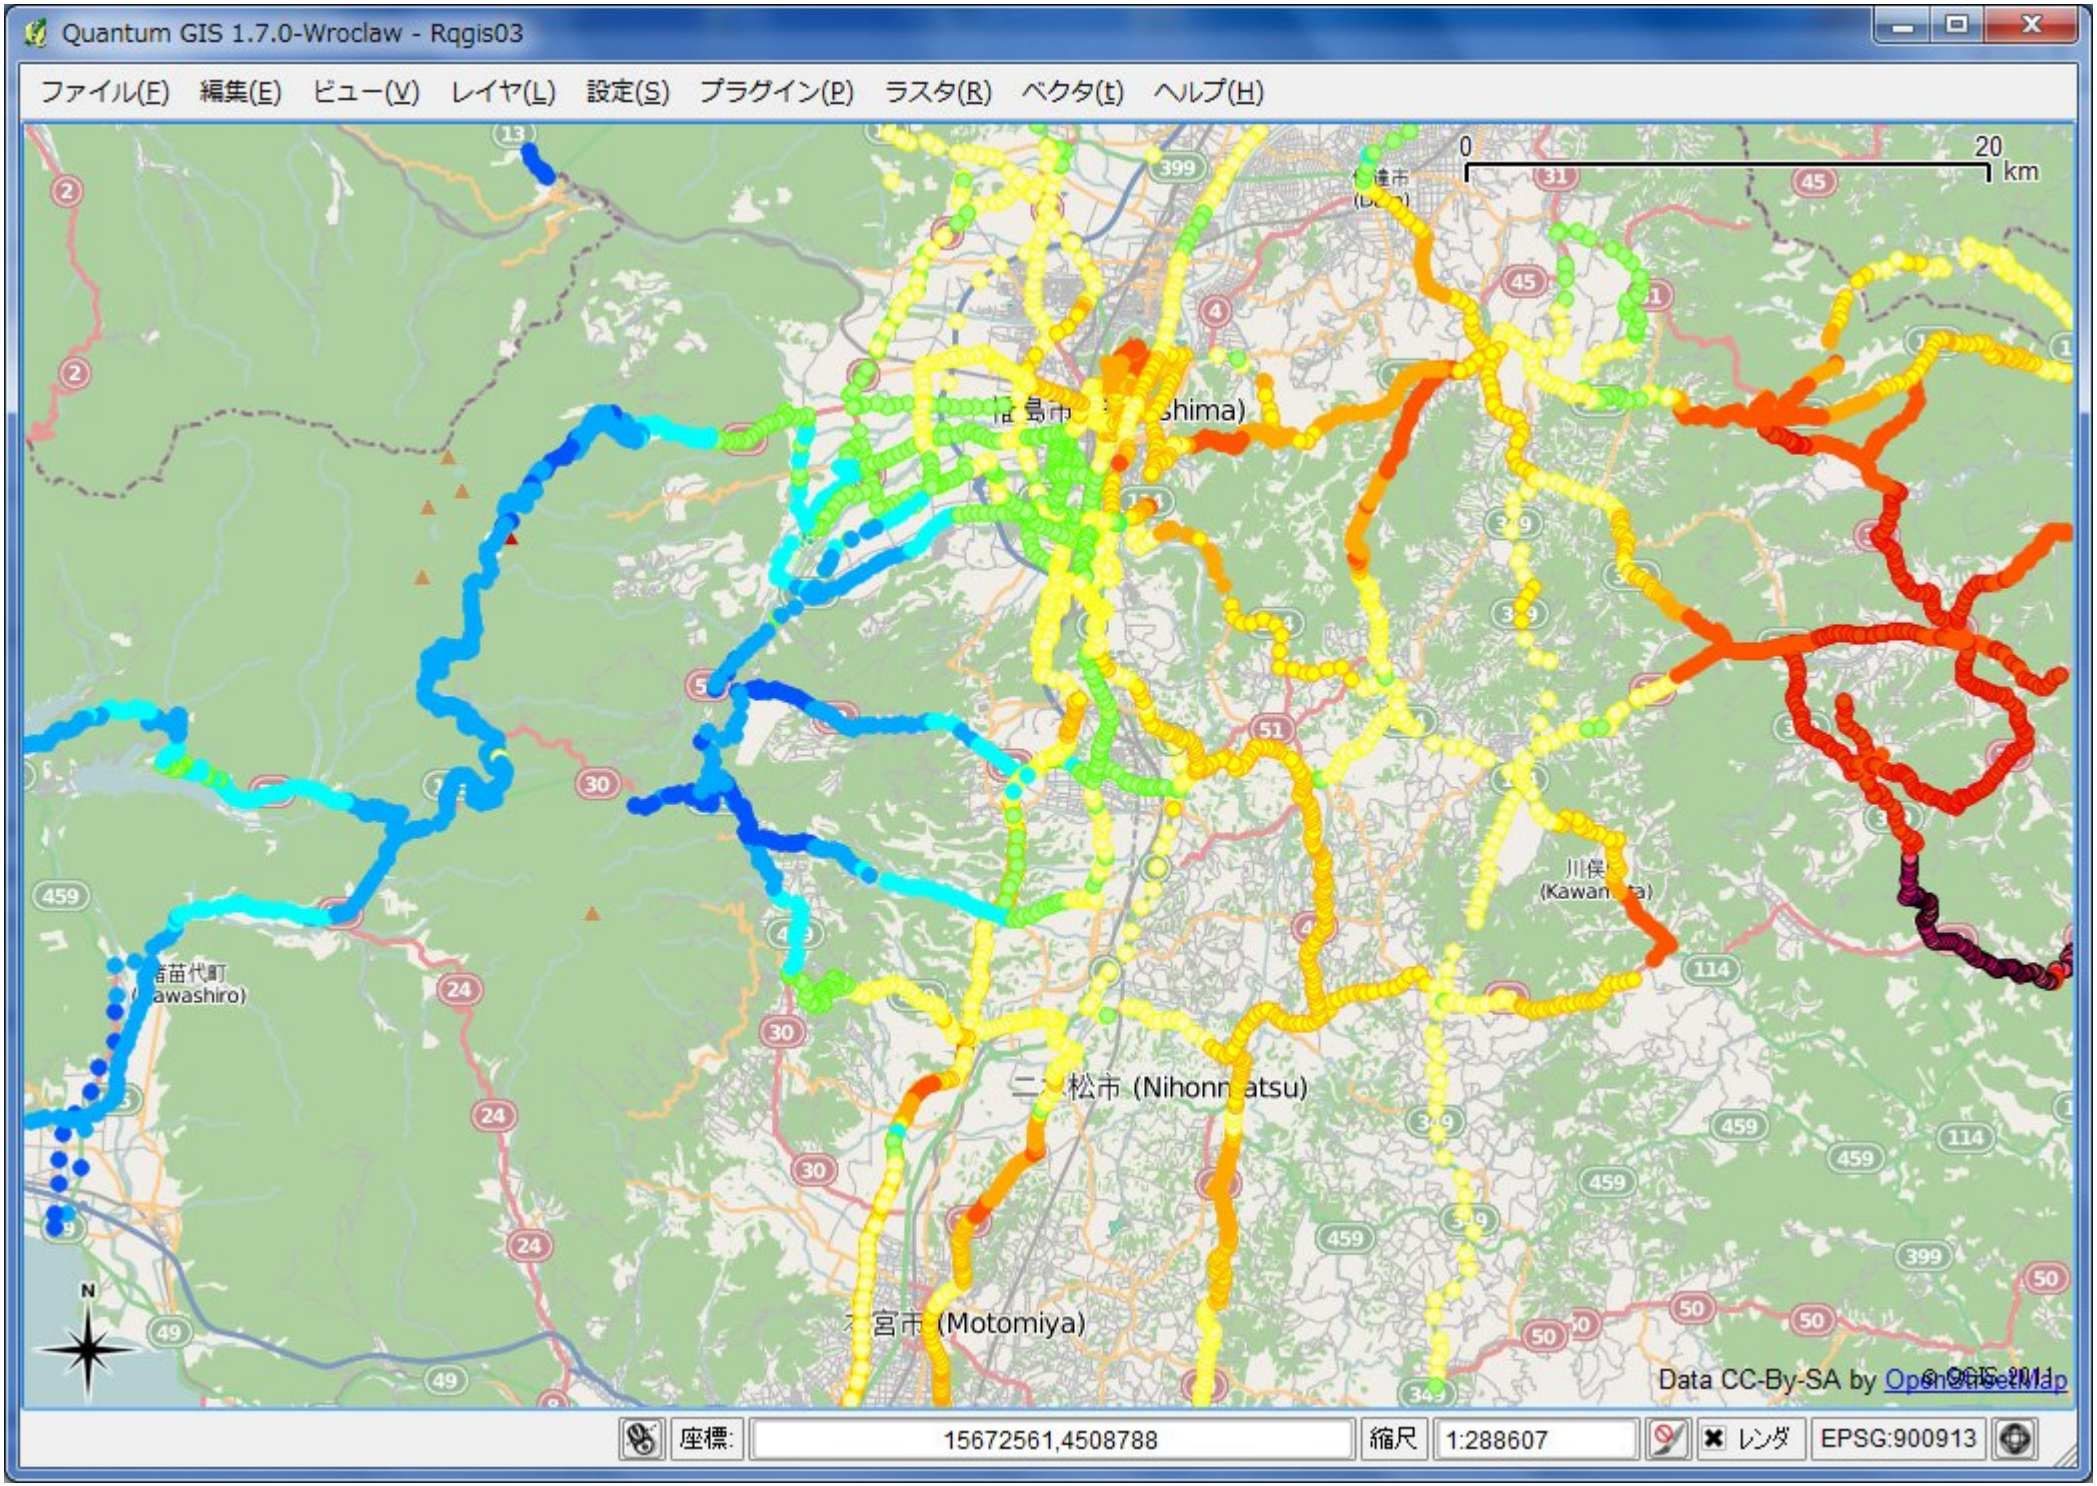

I recorded.
